

RUBBERDEX®

Rubberdex's resilience and durability make it the best choice for wet or dry applications where gouging and abrasion are prevalent.

Features and Benefits:

- Durability and strength due to panel thickness and material options
- The most consistent quality from Polydeck's injection molding process
- Reduces noise levels by as much as 10 decibels
- Best open area in the industry when combined with our Maxi and DMax designs.

Options

- Panels are molded 1' X 2' with thicknesses from 30mm-100mm
- Square, slotted, VR (zigzag), SVR (slotted zigzag), HVR and round openings
- Rubber materials can be PD40 "flexi" for fine sizing applications with sticky fines, PD65 (standard rubber compound), PD60, PD60HT (used in high temps), PD80 or XLR
- Integrated skid bars and 1" and 2" dams
