5 Reasons to Choose RoomKeyPMS

RoomKeyPMS

RoomKeyPMS is a truly comprehensive solution designed to meet multiple needs on one platform and integrate data from across your hotel. To help you get the most out of your demo, we've summarized the key benefits of our PMS into five primary categories.

Best-In-Class Technology

RoomKeyPMS takes today's leading tech innovations and applies them to the hospitality sector. Hotels benefit from a cloud-based app that is accessible from anywhere, easy to scale, affordable to operate and simple to maintain. It also includes smart file backup so that hotels don't have to worry about data disaster prevention or deal with recovery. Finally, the use of a REST API makes implementing RoomKeyPMS a painless experience.

Key Modules and Features

RoomKeyPMS has been specifically engineered to tackle the most complicated and cumbersome workloads that hotels face today. Revenue management is easier with rate restriction capabilities, and housekeeping improves when it's guided by our user-friendly module. Hotels also gain access to tools for coordinating maintenance, organizing group bookings and managing corporate accounts. With RoomKeyPMS, the many of the details that preoccupy hotel managers are either automated, eliminated or streamlined.

Third-Party Connections

RoomKeyPMS empowers hotels to maximize their relationships with OTAs and CRS, including Booking.com, Expedia, TravelClick and SynXis. Data is shared seamlessly between partners, and hotel records are automatically updated when new bookings come in. Best of all, our proprietary booking engine helps hotels drive direct bookings.

Accessible Reporting

RoomKeyPMS makes advanced reporting accessible and intuitive by giving hotels the means to collect, organize and analyze data across far more physical and digital touchpoints. That data is then transformed into in-depth reports that illuminate business intelligence insights automatically. The quality of analytics is impressive, but the simplicity is what really makes this an asset for hotels.

Customer Experience

RoomKeyPMS isn't just a property management system—it's a property management solution. Providing true solutions for our hotels requires an unparalleled commitment to customer service. We offer support so that tech issues never have to disrupt hotel operations. Our solutions are PCI-compliant so that hotels don't have to worry about security or regulatory issues. Plus, we are consistently updating our solution based on user feedback so that it becomes stronger and smarter on a regular basis.
