

BENEFITS OF

CLOUD COMPUTING

#1 REDUCED IT COSTS

Everyones favourite thing to hear - This can save you money! Moving to cloud computing can reduce the cost of managing and maintaining your IT systems. You can eliminate expensive new hardware/ software or system upgrades. Cloud computing is instant and much faster to deploy; there are minimal start-up costs and predictable operating expenses.

#2 SCALABILITY

Ever changing needs require a certain degree of flexibility and using cloud computing allows your business to scale up or down as required to suit your situation. No need to purchase or install expensive upgrades, your cloud service has this covered – freeing up your time to get on with the important stuff.

#3 RECORD PROTECTION

Every archivists biggest headache- protecting old historical records and ensuring that the history of the cemetery is preserved for future generations. Whatever the crisis, having your data stored in the cloud ensures it is backed up and protected in a secure and safe location. Being able to access your data allows you to conduct business as usual, minimising any loss of productivity.

#4 COLLABORATION EFFICIENCY

One of the main benefits of cloud for your cemetery is the ability to communicate and share more easily. All employees, across different locations can sync up and work online, simultaneously and receive any updates in real time.

#5 MOBILITY

Access information from anywhere at anytime – you can get hold of information and work from home, or at the homes of potential new customers!

#6 AUTOMATIC UPDATES

Traditional set down servers require constant updating usually for a fee, however Cloud service providers will usually update regularly with the latest technology and system updates, sometimes without you even knowing it - for FREE! So no big upgrade charges.
