

BuyerQuest and SAP SRM

Extend the Value of your SAP SRM

BuyerQuest enhances SAP SRM through a next generation Procure-to-Pay (P2P) experience. Our software complements SAP and streamlines the buying process, increases user adoption, drives contract compliance, and saves money. The BuyerQuest Marketplace seamlessly connects to SAP SRM to deliver a simple, integrated buying process.

Increase User Adoption

Higher Contract Compliance

Reduce Costs

Two Great Ways BuyerQuest Solutions Supplement SAP SRM

	Private Marketplace	Enterprise P2P
Goods & Services Selection		
RFQ & Quote Creation (Sourcing)		
Requisition Creation and Approval		
Purchase Order Creation		
AP Invoice Automation & Payment		
Master System of Record		
Typical Time to Go Live	1-3 Months	4-6 Months

With BuyerQuest and SAP SRM integrated, users seamlessly move from the requisition to a user-friendly, e-commerce like shopping interface of on-contract products where they are quickly able to find the products they need to complete their work. Items selected in the shopping cart populate the appropriate order in SAP SRM for continued processing.

For those organizations looking to upgrade their entire procure-to-pay process, BuyerQuest also offers a full e-procurement suite that can still be integrated with SAP SRM to leverage its contract capabilities.

A selection of SAP/SRM clients and partnerships.
