

# BuyerQuest and Oracle

Extend the value of your Oracle ERP

BuyerQuest enhances Oracle ERP through a next generation Procure-to-Pay (P2P) experience. Our software complements Oracle and streamlines the buying process, increases user adoption, drives contract compliance, and saves money. The BuyerQuest Marketplace seamlessly connects to Oracle to deliver a simple, integrated buying process.

**Increase User Adoption**

**Higher Contract Compliance**

**Reduce Costs**

## Two Great Ways BuyerQuest Solutions Supplement Oracle

	Private Marketplace	Enterprise P2P
Goods & Services Selection		
RFQ & Quote Creation (Sourcing)		
Requisition Creation and Approval	ORACLE	
Purchase Order Creation	ORACLE	
AP Invoice Automation & Payment	ORACLE	
Master System of Record	ORACLE	ORACLE
Typical Time to Go Live	1-3 Months	4-6 Months

With BuyerQuest and Oracle integrated, users seamlessly move from the work order, requisition, or purchase order to a user-friendly, e-commerce like shopping interface of on-contract products where they are quickly able to find the products they need to complete their work. Items selected in the shopping cart populate the appropriate order in Oracle for continued processing.

For those organizations looking to upgrade their entire procure-to-pay process, BuyerQuest also offers a full e-procurement suite that can still be integrated with Oracle to leverage its financial capabilities.

A selection of Oracle clients and partnerships.
