

Providing **SOLUTIONS** for a Digital World

Your partner for creating the **DIGITALLY EMPOWERED EXPERIENCE**

DYNTEK CORPORATE OVERVIEW

YOUR PARTNER in TECHNOLOGY

>>> Finding the right technology partner to help you compete in an increasingly digital environment can be a challenge.

You not only need a company with a wide range of expertise in the ever-evolving technological landscape, but one who also knows how best to apply the growing array of technology tools that can best drive your organization's success.

DynTek is a national systems integrator, risk management partner, and expert technology consultant serving government, healthcare, education, and commercial organizations. We focus on delivering solutions that enable outcomes that you define. Our broad range of technical expertise and vendor partnerships allow us to deliver solutions that support a digital business transformation framework.

The DynTek Approach >>>

Customers First Process

Every solution we offer begins with a clear understanding of your business and is developed with our customer-first process, which is executed by expert staff and built on a security-first architecture foundation.

Customer Focused

Every engagement begins with a thorough understanding of your business needs.

Full Service

We address the full spectrum of your technology needs.

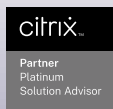

Solutions Oriented

Our service offerings are designed to connect business opportunities with business outcomes. No technology for technology's sake!

Aligned With Key Strategic Partners

We partner with the world's leading technology companies enabling us to provide you with the appropriate solution to achieve your desired business outcomes.

DynTek's Business Transformation Solution Framework

Our technology success framework is built on four main pillars:

Security Solutions

Our executive level security experts ensure you always stay in the forefront of risk management by leveraging the latest in security technology.

Digital Infrastructure

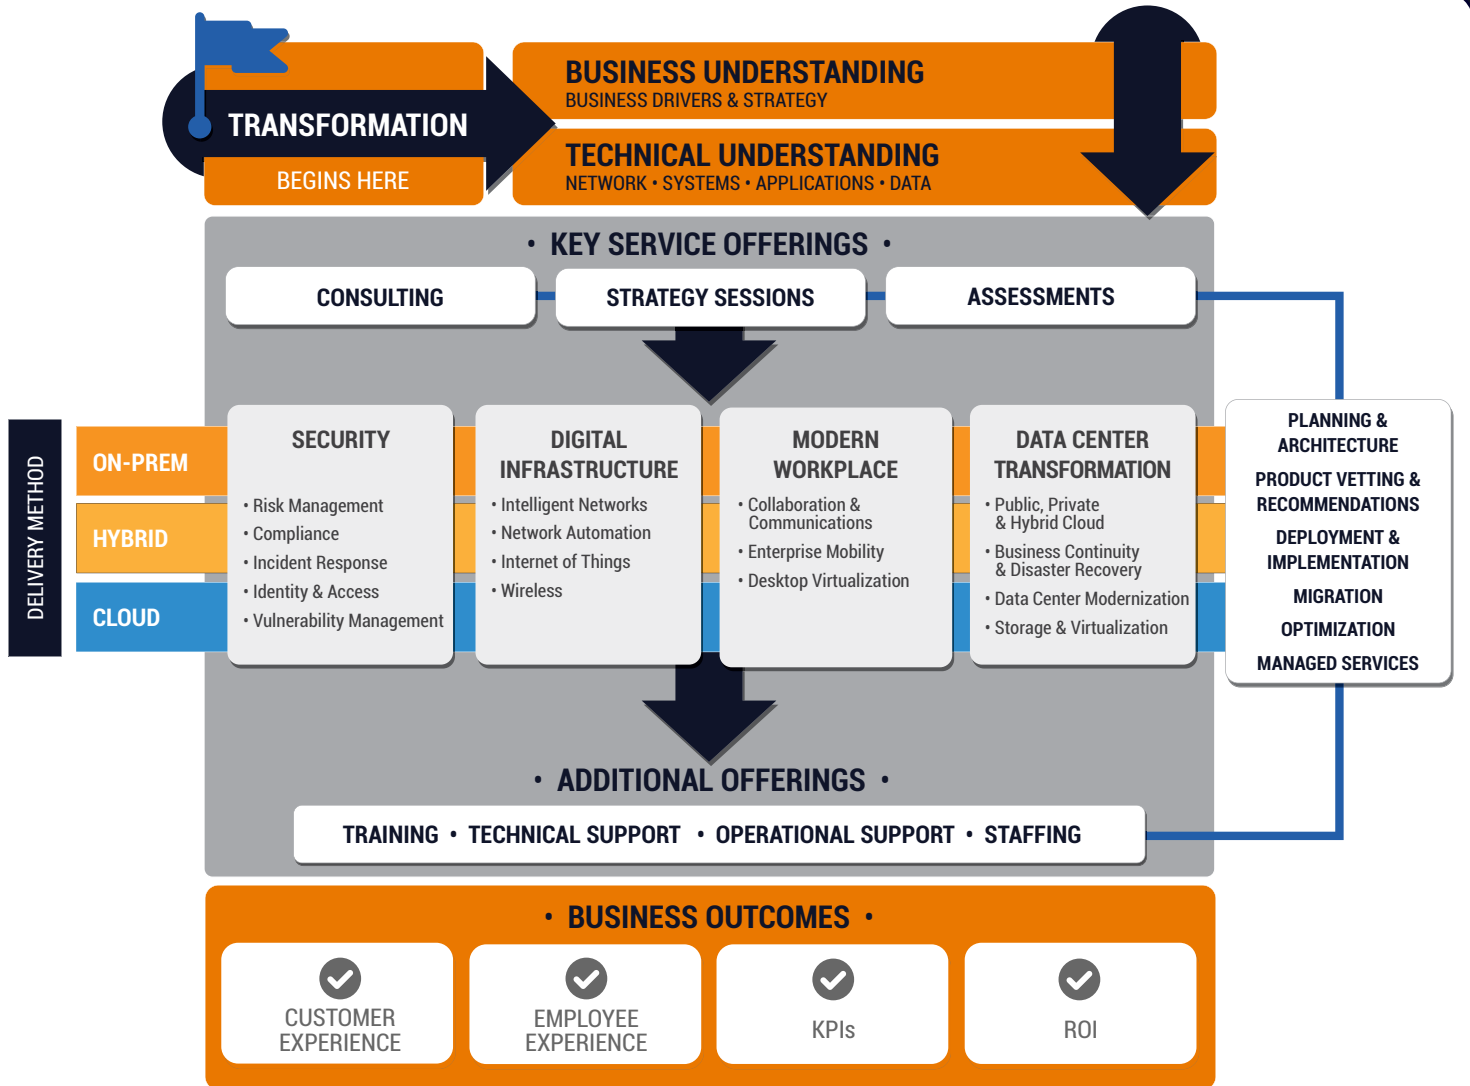

Our technology experts bring extensive knowledge and broad experience to help you build the appropriate network for your specific business needs.

Modern Workplace

We help you implement the best solutions to meet the growing needs of the dispersed workplace to help you enable effective collaboration for on-site and remote workers.

Data Center Transformation

We help you build, deploy, and manage the most powerful, cost effective data center possible.

All of our implementations include training, technical and operational support, and staff as needed. Every solution can be deployed in the way that best fits your organizational needs – on-premises, hybrid, or cloud-based.

The DynTek Service Engagement Methodology >>>

DynTek offers a broad range of service engagements to help envision, deploy and support a comprehensive technology solution aligned to your critical business requirements. On the front-end, we offer extensive consulting, strategy sessions and assessments. From there, we provide planning and architecture development, product vetting and recommendation, and proof-of-concepts.

Once we agree on the roadmap, we move into deployment and implementation, migration, and optimization. Finally, we offer a comprehensive support program to ensure that the solutions we implement continue to deliver the outcomes you expect, whether they be customer or employee experience, improvement in KPIs, or effective ROI.

The DynTek Difference

At DynTek, our clients are like family. We're there when you need us because every member of the DynTek team is committed to ensuring your success. We value long-time partnerships and work tirelessly every day to earn your trust. Throughout your relationship with DynTek, you're served by a single point of contact backed by an extensive support team.
