

## DynTek's Managed Security Services & Security Operations Center Help Organizations Improve Their Security Posture and Fight Advanced Cyber Threats

Today's organizations, at all levels, face an incredible number of security threats that evolve daily. The big challenge is to establish the ability to monitor, identify, respond to, and remediate multiple simultaneous security threats. This becomes even more challenging in an environment that demands compliance with diverse security mandates and regulations, where fiscal prudence is a top priority.

Leveraging the power of Azure Sentinel, DynTek's Managed Security Services help automate security detection and response to protect against internal and external threats to the IT infrastructure, systems, data, and more. Our team will help you enhance security visibility, effectiveness and orchestration, and reduce complexity and alert overload.

### **SECURITY OPERATIONS CENTER**

DynTek's Security Operations Center provides Advanced Threat Intelligence, Threat Hunting, Analytics, Monitoring and Alerting Services. DynTek actively monitors your environment to help you sort through the 'noise' of false positives in order to proactively hunt for threats and turn alerts into actionable intelligence. Through 24x7 'eyes on glass' coverage, we identify critical threats in near real-time and leverage analytics to gain granular detail and context for each security incident. All security events are correlated against ~3.8 million indicators of compromise in an automated manner to help detect threats that are not being identified by the security solutions in your environment. In the end, this leads to more accurate information and faster resolution time. You gain immediate insight so you can pinpoint the physical location of an incident and take appropriate action.

# **SOLUTIONS**

DynTek's Managed Security Services are customized to your unique environment and user count and cover:

#### Cloud

- Office 365 E3/G3/A3
- Office 365 E5/G5/A5
- Microsoft 365 E3/G3/A3
- Microsoft 365 E5/G5/A5
- Microsoft Defender for Office 365
- Microsoft Defender for Endpoint
- Azure Active Directory
- **AWS**
- Google Cloud Platform

#### **On-Premises**

- Windows Workstations/Laptops
- Windows Server
- **Active Directory Domain Controllers**
- **Exchange Servers**
- **Endpoint Protection Platform**
- **Endpoint Anti-Virus Solution**
- IDS/IPS

Plus, hundreds of additional devices are supported including Cisco, Citrix, Palo Alto Networks, IBM, HP, and more.

# **FEATURES**

#### PEOPLE + PROCESS + TECHNOLOGY

- 24x7x365: Staffed with experienced and trained analysts actively monitoring customer environments
- Leverages the latest security technology and toolsets to maximize response times for security events in our customer data sets
- Finding and blocking malicious behavior in near real-time
- State-of-the-art analytics platform with granular incident detail for fast resolution
- Customized solutions for individual client needs

### **BENEFITS**

- Peace of mind with 24x7x365 coverage
- Security subject matter experts ondemand for rapid escalation
- Faster response time
- Meaningful incident data
- Increased accuracy and lower rate of false positives
- Near real-time alerting
- Cloud-hosted solution, easy implementation
