

Position Title: Intermediate C# Integration Developer
Position reports to: Line Manager
Direct Reports: N/A
Office Location: Adapt IT Johannesburg Campus

PURPOSE OF THE POSITION

We are looking for a skilled Intermediate C# Integration Developer that has a passion to work in an established company with a fresh dynamic team. We are passionate about our solutions, our people and what we bring to market and we are looking for candidates that share this vision and have a keen appetite to be involved in what we are doing within the food, beverage & hospitality space, delivering niche solutions and integrations with MICROS Point of Sale solutions.

As an C# Integration Developer, you will play a vital role in contributing to our existing team of technology enthusiasts. Your role will be influential in contributing and development of a variety of technically challenging projects.

PRIMARY RESPONSIBILITIES FOR THE ROLE

- High proficiency in object oriented analysis and design patterns
- Experience with building Unit Tests and Integration testing
- Ability to produce and update product requirements specification, as required.
- Review product requirements in order to give development estimates and product feedback.
- Ability to produce technical documentation that shares knowledge effectively.
- Experience with Source Control with versioning, branching and similar concepts.
- Strong analytic, written and verbal skills

MINIMUM QUALIFICATION AND EXPERIENCE REQUIREMENTS

- Experience with Point of Sale solutions
- 3-4 Years' Experience as an Intermediate C# Developer
- Experience with Loyalty Programmes
- Exposure with Payment Systems / PCI
- Relevant tertiary qualification in B. Sc. or B. Com in Computer Science; or alternative software development degree.
- At least 3 to 4 years of experience working as an Intermediate with C#
- Proven experience with Web Services, RESTful Services and similar integration and web service experience
- At least 3-4 years' experience with Microsoft Technologies, including C# & .NET Framework.
- Experience with designing and implementing Microservices with Microsoft Web API
- Advanced C# skills including the concepts of Generics, LINQ, dependency injections, interfaces, etc.
