

USING TRAVERSE FOR HIGH-VALUE WORK WITH FAMILIES

Traverse empowers caseworkers with the right information at the right time so they can focus on families and make informed, confident safety decisions. Here's how.

COLLECT CONTENT ANYWHERE, ANYTIME FROM ANY DEVICE.

The intuitive design of Traverse allows caseworkers to collect documents, forms, photos, audio, or video from anywhere using mobile solutions and context-aware, point-of-entry capture.

FIND AND FILTER CASE CONTENT BY DATE, CONTENT TYPE, OR FULL TEXT SEARCH.

Traverse automatically turns the entire case file into searchable text. Caseworkers can quickly and easily find what they need, even without knowing exactly which document contains the information.

SAVE TIME COMPLETING LONG OR COMPLEX FORMS.

Caseworkers can copy and create forms to make minor changes without re-entering unchanged historical data. By reducing duplicate data entry, caseworkers improve interactions with clients.

HAND OFF FORMS FOR IMMEDIATE SIGNATURES.

Caseworkers can digitally hand off forms to a supervisor to review or sign. This helps caseworkers refer families to services faster.

GET INSIGHT INTO MAJOR CONCEPTS RELATED TO A CASE.

Traverse automatically shows major concepts in a case regarding drugs, risk factors, and protective factors to make data-driven safety decisions.

SURFACE PEOPLE CONNECTED TO A CASE.

Traverse uncovers people mentioned in the case content and how they are connected, including family and non-family members. Caseworkers quickly identify possible placement options or positive supports.

WORK REGARDLESS OF CONNECTION OR LOCATION.

Traverse is cloud-based technology powered by Amazon Web Services (AWS). Mobile applications are optimized for when caseworkers are in the field engaging with families and work in disconnected mode.
