

## **CIORReview Names MedyMatch in 100 Most Promising Big Data Solutions 2016**

*CIORReview has named MedyMatch one of the 100 most promising Big Data Solution Providers in 2016. Over 1,000 companies were considered for this honor.*

**Tel Aviv, Israel –July 21, 2016** --- MedyMatch Technology Ltd., announced today that it has been ranked in the list of “100 Most Promising BigData Solution Providers” by CIORReview. A link to the article can be found here <http://bigdata.cioreview.com/vendor/2016/medymatch> .

“The companies selected for our 100 Most Promising BigData Solution Providers 2016 list are an elite group of companies whose products and solutions are changing their respective industries,” said Jeevan George, Managing Editor of CIORReview. “We are proud to feature MedyMatch Technology in this edition for its effort in helping organizations to easily and quickly adopt BigData analytics as a core part of their business and accelerate conversion of data into valuable business insights.”

“It is an honor to be recognized by CIORReview for MedyMatch’s achievements in cognitive analytics, artificial intelligence and medical imaging, said Robert Mehler, coFounder & COO. “It is a testament to the accomplishments and capability of our product development team in conjunction with our medical big data clinical partnerships,” adds Mehler.

MedyMatch addresses the needs of healthcare providers and patients by utilizing deep vision, advanced cognitive analytics, and artificial intelligence to deliver real time decision support tools to improve clinical outcomes in acute medical scenarios. “We are structuring unstructured data and solving the problems in this space using new analytical tools,” says Mehler. “The data in healthcare is vast, unstructured, and relatively sparse and many healthcare providers find it difficult to unlock the potential of data, especially, in the emergency room, where physicians need access to real-time information to help patients recover quickly,” adds Mehler.

### About MedyMatch Technology, Ltd.

MedyMatch utilizes advanced cognitive analytics and artificial intelligence to deliver real-time decision support tools to improve clinical outcomes in acute medical scenarios. The foundation of clinical discovery and value creation lies in the deep clinical understanding of how to diagnose disease, utilizing the right data (electronic medical record, medical imaging, and genomic data). The MedyMatch team of artificial intelligence, machine learning, deep learning and algorithmic experts along with its medical and science advisory boards are achieving breakthroughs in standards of cost and care.
