Data

Structured, organized quality data for the enterprise

Principles

- Data Governance
- Data Management
- Date Models

Examples

- Democratized data
- Ownership, Quality
- Trusted Reporting, AI supported decisions

HOW

Composable Architecture

Modular technology to enable business resilience

Principles

- Modularity – packaged business capability
- Discovery – easy to find, integrate and (re)use
- Autonomy – easy to change, replace, remove
- Orchestration – secure by design and ready to be used

Examples

- A 'Pricing Engine' used for price determination for a wide variety of products by different business lines

Connected Enterprise via Suite Qualities

Easy access to technology capabilities

Principles

- Commoditization of connectivity
- Accessibility and usability
- Innovation enabled through zero friction

Examples

- Every (business) capability is digitally published
- Exposed capabilities may be consumed, combined and innovated upon without consent of the owner
