

A Collaboration of  and 

SAP Enterprise Architect Global Summit

Virtual Event - March 1-3, 2022

Why Enterprise Architecture is Key to Success

Damien Johnson – Chief Architect Global RISE with SAP
Ecosystems, SAP America

We understand your issues

You need to develop new business models to avoid disruption in your industry

“While most executives claim to be familiar with next-generation technologies, only 10% of companies have a digital business model in place to fully use these opportunities.”

ESCP Business School, Berlin
and MIT Sloan Center for Information Research

You must drive new efficiencies to reinvest into your growth

“Core enterprise operations still take considerable resources and time... between 20 and 40% of total operational expenditure.”

McKinsey

You have to modernize your mission-critical systems without business risk

“The expected financial impact of downtime from IT is about 8% of enterprise revenue for Fortune 1000 enterprises. The biggest downtime exposure is from mission critical systems.”

Wikibon

**RISE
WITH
SAP**

Driving business innovation together

Take the lead

with industry innovation
for top-line, bottom-line,
and green-line growth

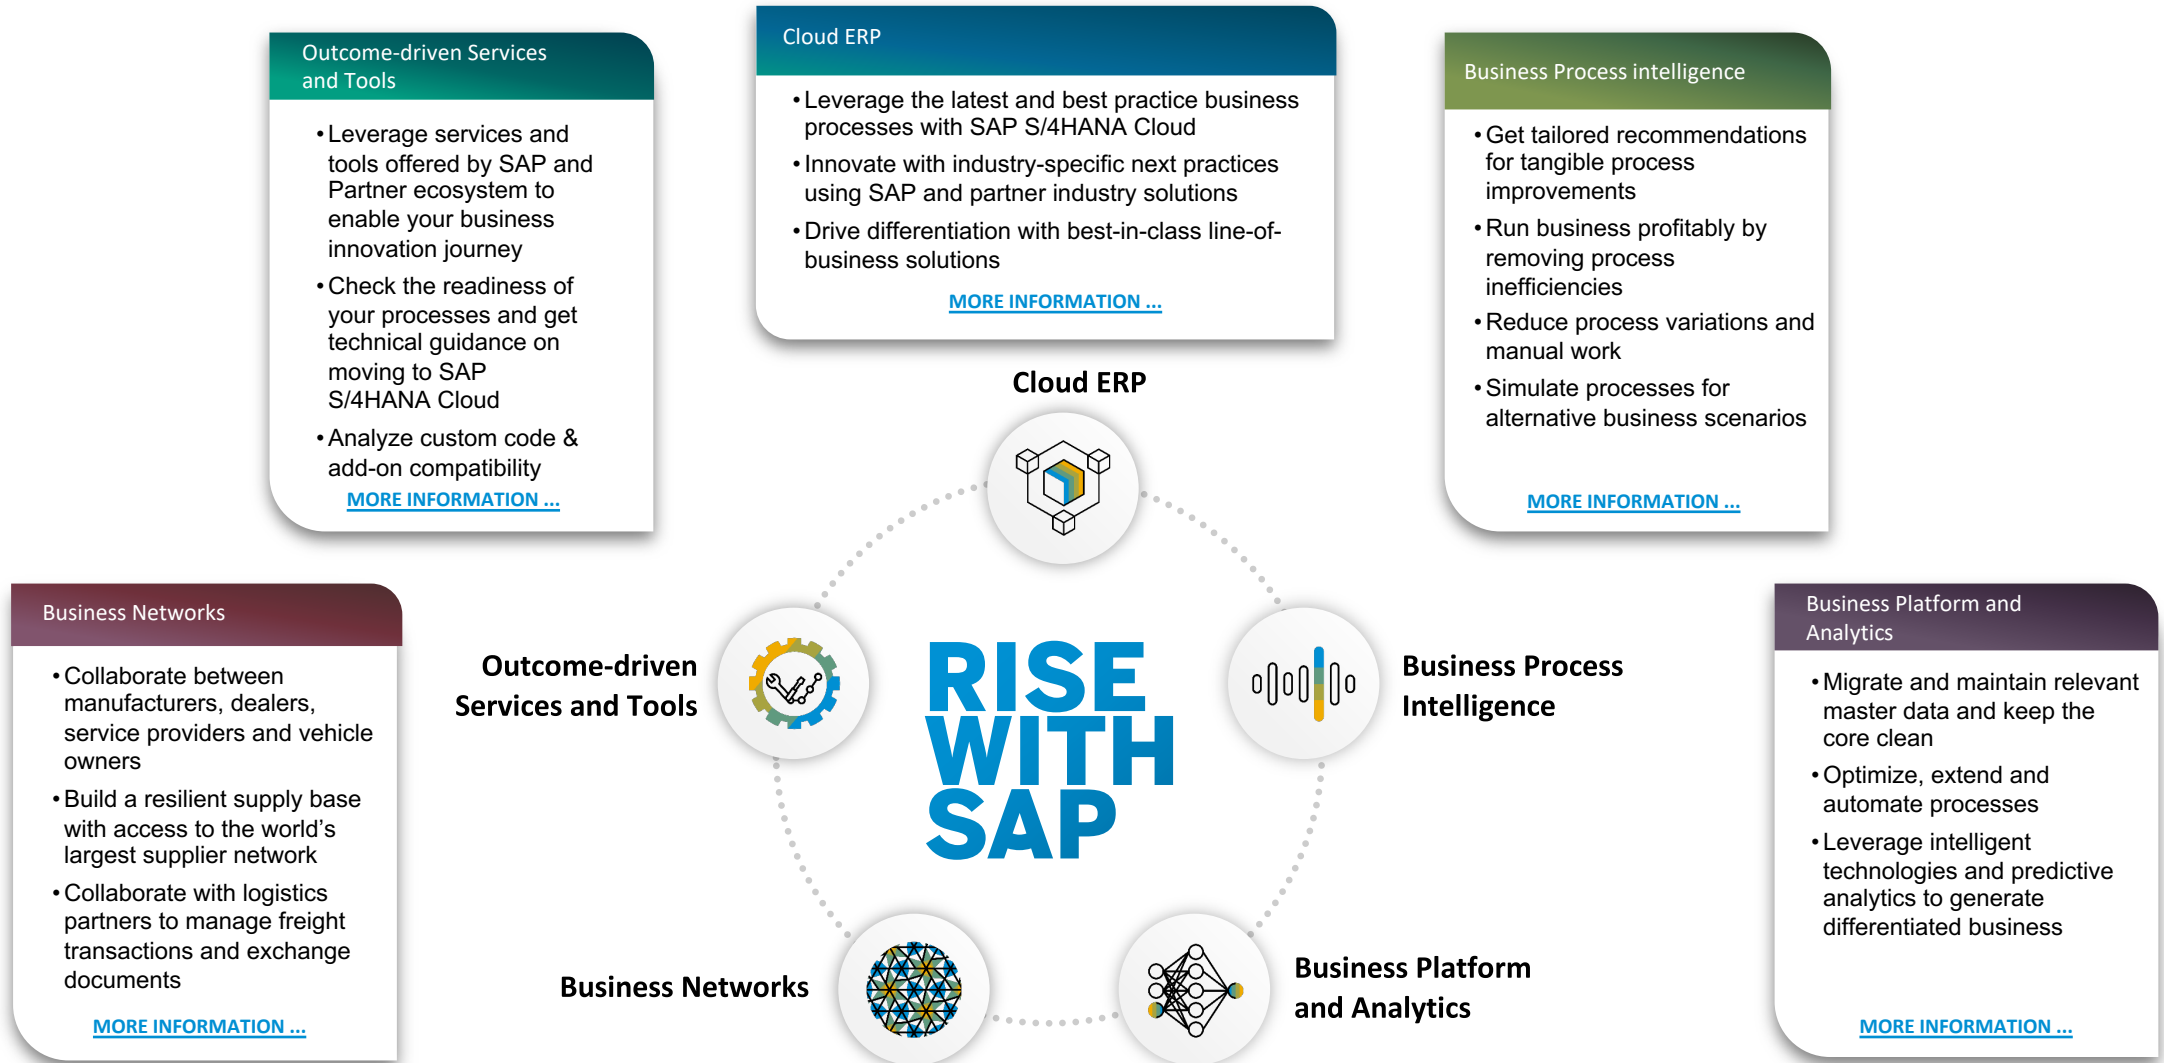

Never stop improving

with continuous insight
to optimize business
processes

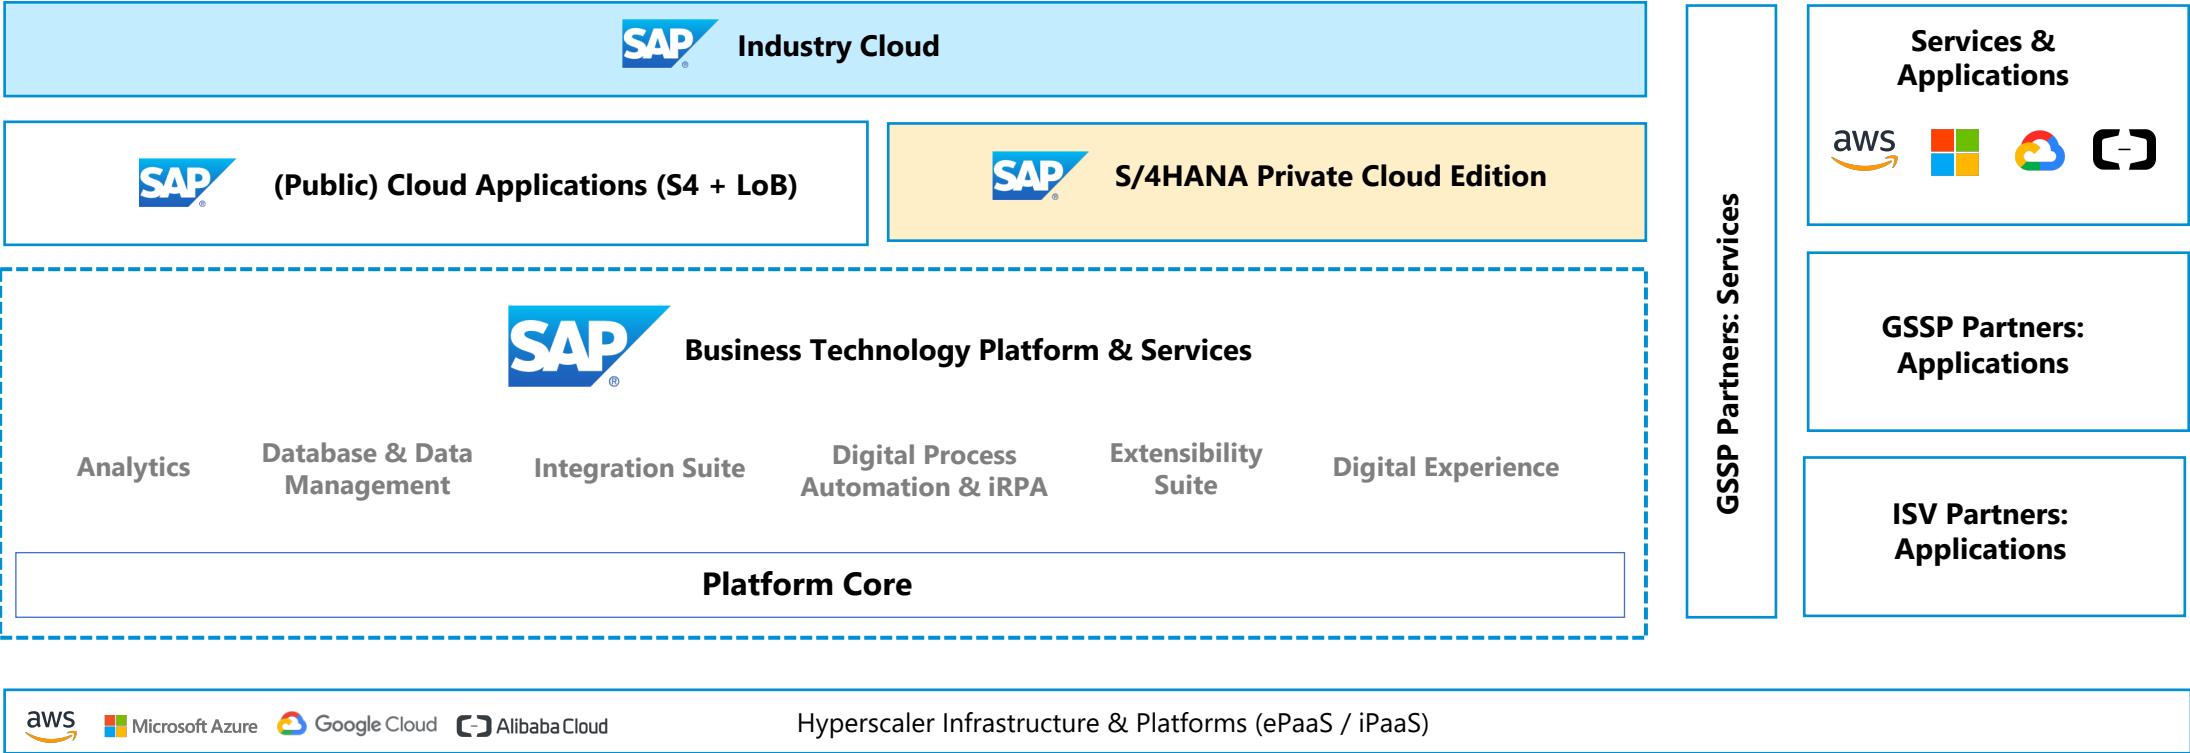

Secure your success

with a trusted partner for your
business needs, at every step
of the way

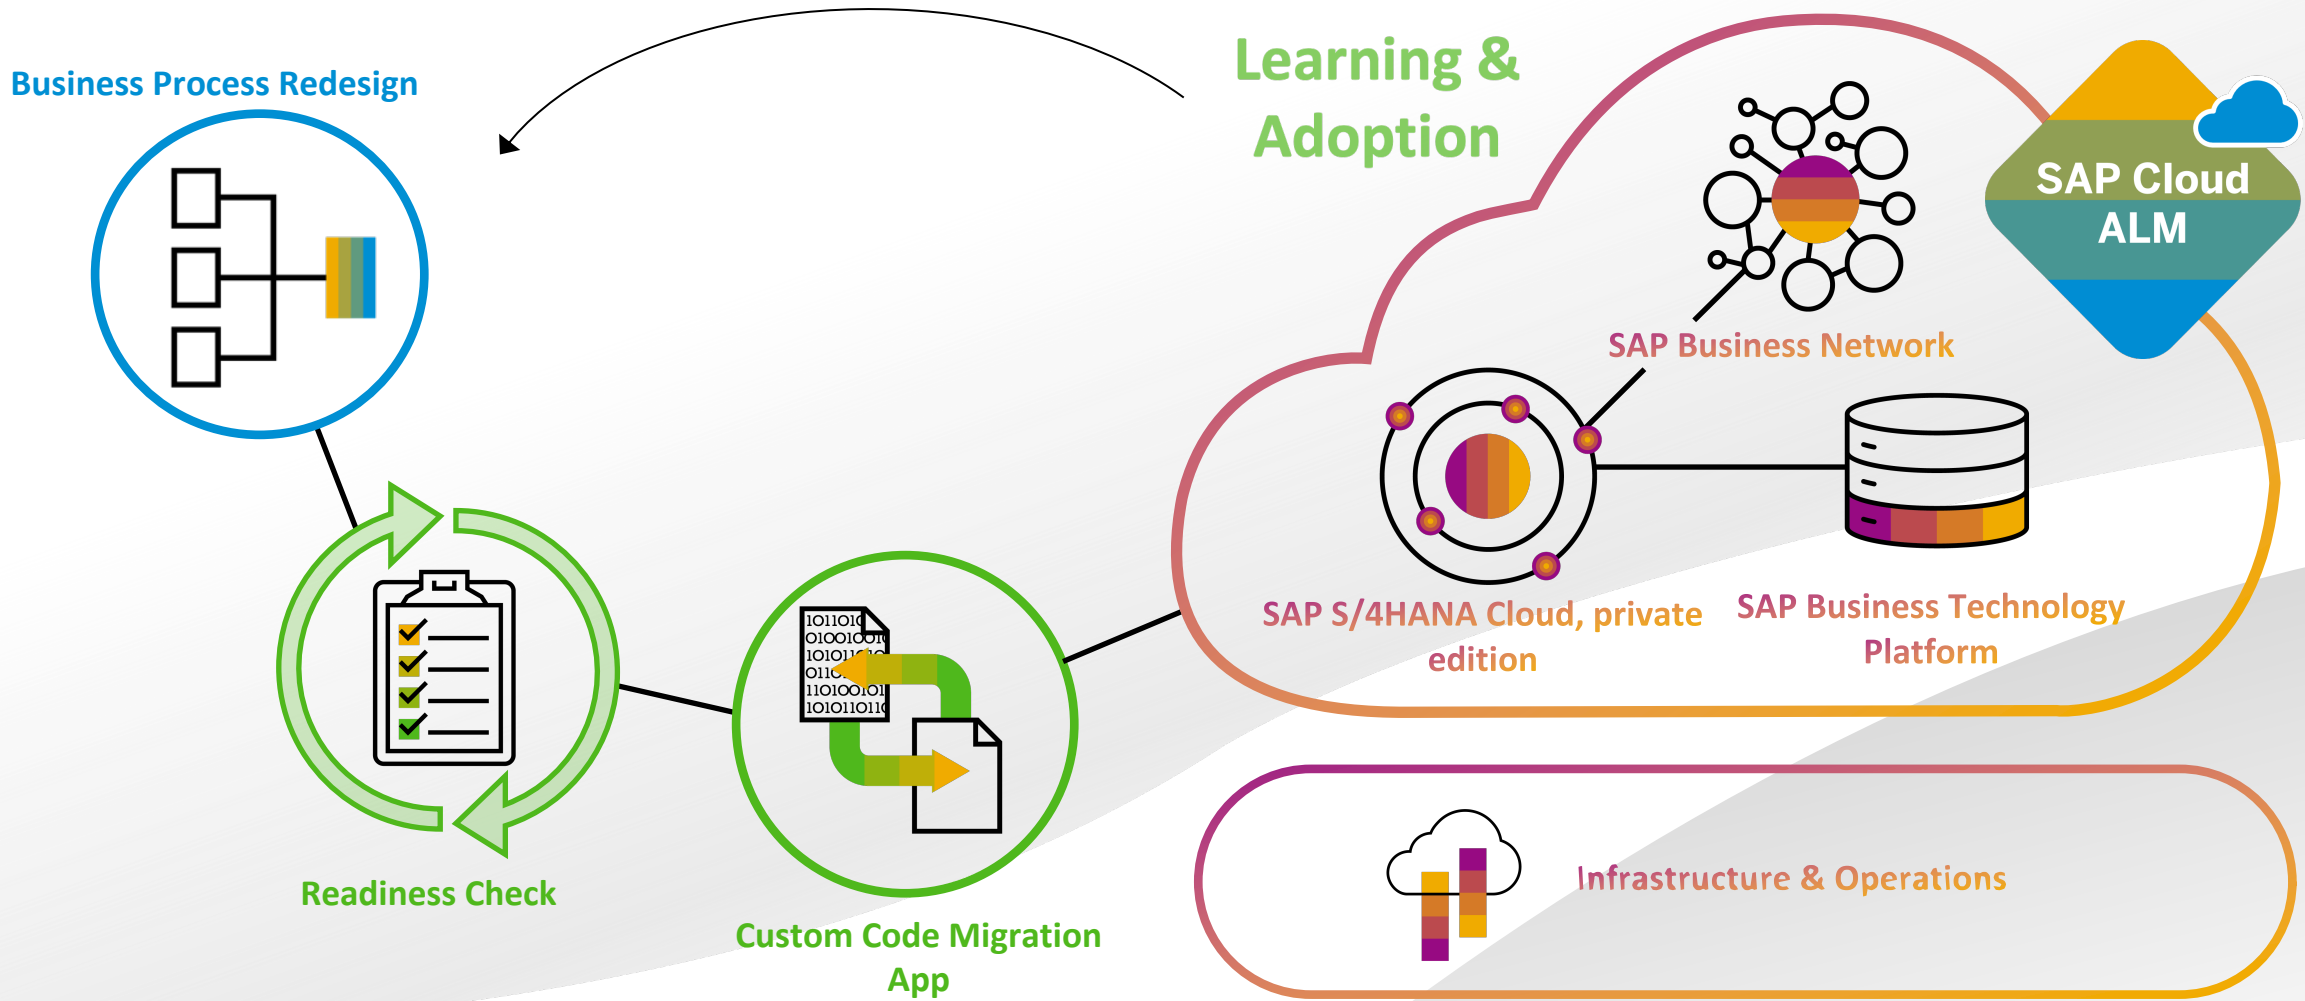

RISE with SAP brings together the necessary components to help customers deliver on their digital transformations ...

S/4HANA Private Cloud – Essential Architecture with BTP & Partners

The RISE Journey

RISE with SAP brings together what you need to transform your business in the way that works best for you – regardless of your point of departure or how fast you want to move.

RISE with SAP: Service Offering: PREMIUM ENGAGEMENT – APPLICATION ARCHITECTURE EVALUATION

Customer Needs

- Uncertainty on the design of blueprinted processes at net-new or existing customers as it relates to maximum standardization or optimal utilization of the SAP solution portfolio
- Concerns on robustness, operability, and sustainability of a process and solution design for a new or already implemented SAP solution

Business Outcomes

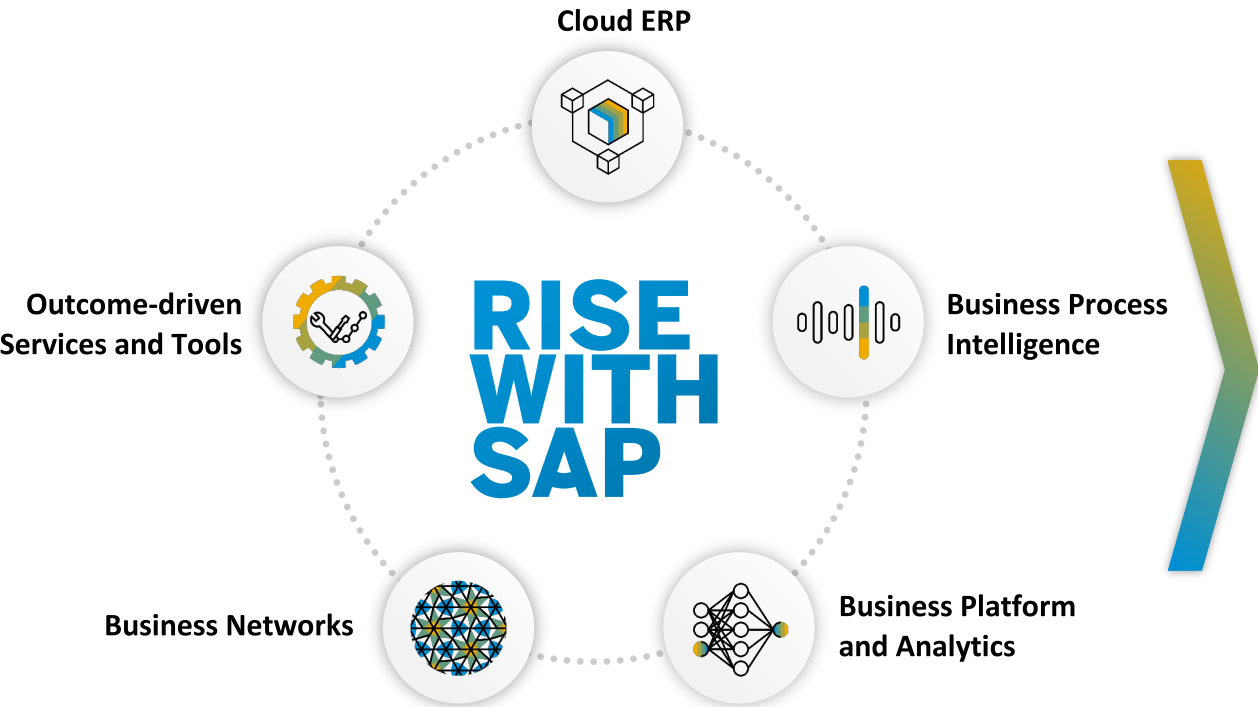

- Validate process design and blueprint in regard to maximum standardization and the SAP solution portfolio and road map
- Focus on the SAP solution portfolio and underlying process and data consistency as well as solution supportability and operability
- Provide quality assurance by identifying and reviewing issues and risks affecting the project

Service

- Review of core business processes and supporting master data, identified gaps, and planned development requirements by industry-experienced solution architects
- Analysis of solution landscape on a high level including interfaces, data volume, and custom development aspects
- Evaluation of business blueprint and identification of risks and design flaws
- Review of processes with industry and SAP solution best practices in mind
- Delivery of a final report summarizing the covered areas, core processes, and the team's recommendations

... unlocking three sources of value

Take the lead
with industry innovation for top-line, bottom-line, and green-line growth

Leverage differentiating business capabilities and industry next practices that create new revenue streams, improve efficiency, enhance employee engagement and allow for running sustainably

+

Never stop improving
with continuous insight to optimize business processes

Identify and prioritize optimization opportunities with instant process analysis, benchmarking against industry peers, and tailored insights to automate with AI

+

Secure your success
with a trusted partner for your business needs, at every step of the way

Benefit from cloud delivery capabilities that accelerate time-to-value, reduce overall TCO, and mitigate risk while simplifying technology consumption through 'as a service' experience
