eDiscovery and Litigation support processes continue to grow in complexity along with performance demands, driving law firms and corporations to seek time and cost-effective alternatives to manage eDiscovery projects.

Having access to analytics and other technologies to tame data is critical. Leveraging comprehensive services and technology maximizes productivity and provides the path to ensure your success.

AvansicNOW eDiscovery Subscription Services is backed by CEDS Certified experts ready to support you as needed to skillfully complete eDiscovery projects. Execute tasks when and how you want, get the results you want, and get the best price for you and your clients.

Empower your Team and Increase Efficiency and Client Service

Self-service eDiscovery has never been easier or more reliable.

With AvansicNOW you get automated error handling, built-in quality control, analytics, self-paced training, and more. And you never have to unlock features as they're added. Completely manage cases from data and ESI import to document review and production.

eDiscovery Subscription Services can enable your team to find the right balance of control and capacity, familiarity and flexibility, robustness and reliability.

Key eDiscovery Functions You Can Execute Yourself

Data Loading

Drag-and-drop files directly, no need to install extra software or ask for custom uploads

Upload any type and size file, native or load files, including whole folders too

Automated error handling and file type detection, as well as global de-duplication

Review, Search & Analytics

Store files in AvansicNOW to keep them secure in one place

No need to download files or have to use an external program to review them

Combine different types of searches without fear of poor results

Production

Establish and deliver on specific agreed upon formats and timeframes

Leverage templates for mass exports on the fly

Accommodate last-minute attorney requests for depositions or other needs

AvansicNOW gives you the technology and workflow tools you need to drive proficiency and achieve maximum eDiscovery project success.
