

The State of Digital Mortgage Adoption

We asked 100 leaders at the Top 500 US mortgage lenders to tell us how their use of digital closings is impacting their business. Here is what they had to say.

Lenders Overestimate Borrower Satisfaction with their Tech Stack

60% report that their technology meets or exceeds borrower expectations

While only 50% of consumers report being satisfied with the speed of their loan transaction

Lenders With eClosings Report Better Business Outcomes

And the More Digital the Transaction, the Better the Results

Among those using a Hybrid Model

10% Improvement in Document Error Rate

12% Improvement in Loan Dwell Time

Among those using a full eClosing (including RON and eNote)

23% Improvement in Document Error Rate

16% Improvement in Loan Dwell Time

eNotes are Gaining Traction

The Majority of Lenders have eNotes on their Roadmap.

Digital Mortgages are Here to Stay

As the market races to meet borrower expectations and improve operational efficiencies, more lenders are pushing towards fully digital closings.

2022

is the Year to Scale to a Fully Digital Model

3 out of 4 Lenders Plan to Increase their Tech Spend in 2022
