

## Business operations reflect better with SAP Business One®

PULSAR, manufacturer of high-visibility waterproof and protective clothing, turned to B1 Solutions to implement SAP Business One to push growth. Now the PULSAR team can work more efficiently with a simple, yet effective ERP platform that can be seamlessly altered to match requirements.

### Before: Challenges and Opportunities

- PULSAR's previous software was very restrictive, difficult to navigate and hindered growth potential.
- Moving products between warehouses was complicated.
- A new ERP platform was required that would enable staff to multitask and work more efficiently.

### Why SAP Business One and B1 Solutions

- SAP Business One came highly recommended and could offer PULSAR a wider spectrum and range of activity options with add-ons.
- B1 Solutions was very professional, efficient and available to help at the click of a button.

### After: Value-Driven Results

- Since implementation, PULSAR now has a cockpit system with invaluable time-saving short cuts for every day items across all departments.
- Productivity has sped up, making PULSAR a more competitive company.
- Communication with customers regarding stock levels and future stock availability has improved.
- Goods can be dispatched accurately and on time.
- Management now know when long term purchases are due in and can also successfully compete for bigger orders.

"SAP Business One and B1 Solutions represent professionalism and give us **the confidence and ability to continue with the long term growth of our business.**"

Stuart Jukes – Managing Director, PULSAR
