ODASEVA ENTERPRISE PROTECTION SOLUTIONS

# The right solution, wherever you are on your data management journey

In the enterprise, data challenges are complex. The ideal foundation for your data is a system that works seamlessly within the broader context of your technology and your business.

Odaseva offers ready-made combinations of our products designed to solve critical enterprise data management challenges and deliver exceptional value at every stage of digital transformation.

## Key Benefits

- ✓ Avoid data loss or downtime in the event of a disaster, human error, or data breach
- ✓ Anonymize sandbox data that contains PII and is accessible by third-parties
- ✓ Comply with data privacy regulations like HIPAA, GDPR, and CCPA
- ✓ Easily transfer data from your Salesforce org to a data lake or other data storage system without overusing API calls

## ODASEVA ENTERPRISE PROTECTION

### Start with the best defense for your data

Odaseva Enterprise Protection delivers a seamless foundation of true protection for your Salesforce data—going beyond simply backing up production data. Be a proactive steward of your data and solve data problems before they happen.

## ODASEVA ENTERPRISE PROTECTION PLUS

### Enhance protection for your most critical objects and extend the value of the data you protect

Odaseva Enterprise Plus offers an extra layer of protection for your most valuable data and powerful replication to get your data anywhere you need, quickly and effectively—even with the largest data volumes.

# Odaseva Enterprise Protection Solutions

Odaseva Enterprise Protection Solutions are packages designed to protect your mission-critical Salesforce data everywhere it's vulnerable.

| | Odaseva Protection | Odaseva Protection Plus |
|---|:---:|:---:|
| Backup & Restore | ✓ | ✓ |
| Sandbox Anonymization | ✓ | ✓ |
| Advanced Analytics | ✓ | ✓ |
| Odaseva API/CLI | ✓ | ✓ |
| Cloud Replication | | ✓ |
| 1h High Frequency Backup | | ✓ |

# Capabilities

- Best-in-class **Backup & Restore** ensures you can protect your data and restore it in record time, no matter what happens

- **Sandbox Anonymization** allows you to give any development team fresh, comprehensive data to work with, without concern about breaching confidentiality

- Odaseva **Advanced Analytics** gives you a detailed, actionable view into the health of your Salesforce data and the status of every backup

- **The Odsaeva API** allows you to automate every Odaseva platform function via integrations with your existing systems

- **Cloud Replication** makes it easy to move data from Salesforce to any common cloud platform

- **High-Frequency Backup** ensures your most valuable data doesn't get lost
