A woman with short blonde hair, wearing a dark blazer over a light-colored top, stands and presents to a group of people seated at a table. The background shows a meeting room with a whiteboard and large windows. The entire image is overlaid with a purple tint.

a School for tomorrow. strategic educational development program

YOUR SCHOOL'S JOURNEY OF DISCOVERY

disc™

are you thriving in your world?

a **School for tomorrow.** helps its students, teachers, and school leaders to build the character, competencies, and wellness that allows them to make progress on a pathway to excellence that gives them the adaptive expertise and self-efficacy required for them to thrive in a world that needs them to:

At a **School for tomorrow.** we engage with educators, school leaders and their communities locally and internationally to co-create a shared story of yesterday, today, and tomorrow. We work beside leading schools, school networks, and professional associations to further educational aspirations and the long-term interests of communities, enterprises, and organisations. In doing so, we build the tools with our partners to help students, teachers, leaders, and school teams to thrive in their world.

We bring our deep first-hand understanding of what is happening in the daily practice and culture of the best schools around the world, drawn from 40 years of global practice in North America, Europe and the United Kingdom, South Africa, South-East Asia, New Zealand, and our original home country, Australia. As such, we are committed to an evidence-based body of work that:

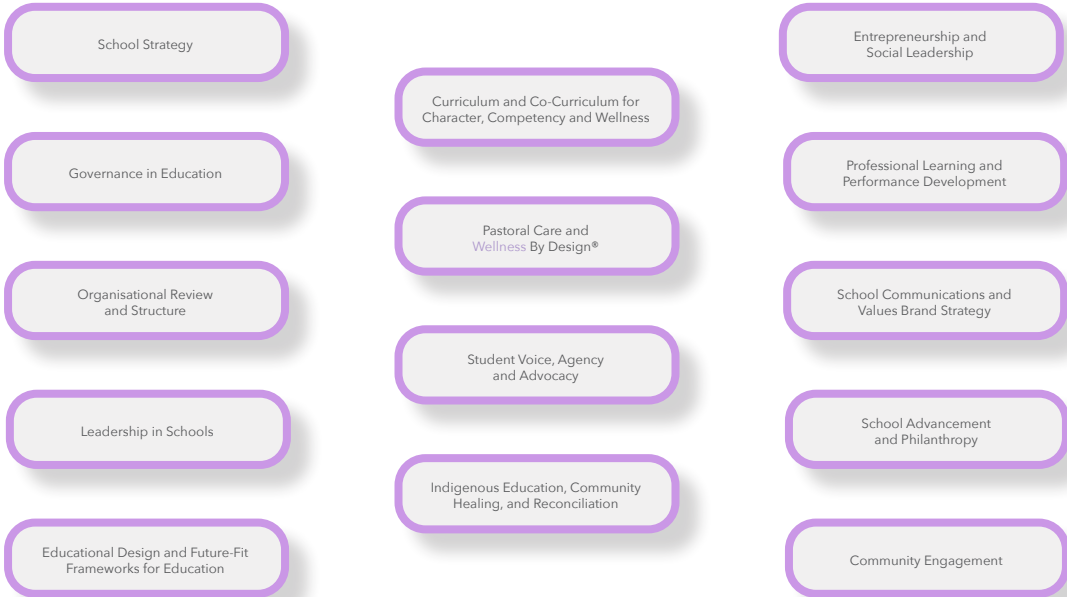

- *Illustrates a purpose-driven rationale and holistic methodology for improved outcomes*
- *Delivers outstanding solutions tailored to meet the needs of specific communities*
- *Strengthens growth-minded change culture*
- *Supports the people in schools to be the best versions of themselves in a rapidly changing world*

Drawing on our research and the work of other leading educators, we use our proprietary 5D process to collaborate with school leaders, governors, practitioners, and learners. We co-create sustainable School Strategic Educational Development Programs that contribute to enduring experiences of excellence within communities of inquiry and practice. These programs do not manifest overnight. Often, these are the result of at least 3-5 years of patient work together as client and consultant.

Our work will be governed by agreements written first as *Proposals* and then refined annually into *Terms of Reference* documents. This all typically involves agreed deliverables that will incorporate onsite and virtual meetings, workshops, and a combination of face-to-face, blended, and online professional learning and performance development. All of these services and products are supported by offsite preparation and liaison by our dedicated team.
