

You asked, we listened.

Introducing **Serverless** Integrations.

PAAY's new Javascript integration allows merchants to implement 3-DS in their checkout process in a matter of minutes.

- ✓ Your merchants do not need to install anything on their server.
- ✓ Merchants simply copy & paste Javascript onto their payment page.
- ✓ Merchants can use a sandbox to test with demo credit cards.
- ✓ All merchants receive risk FREE trial their first month.
- ✓ Futureproof-updates and feature upgrades happen on our end, including 3-DS 2.0.

Getting started has never been easier.

1. Board your merchants onto the PAAY dashboard.
2. Send your merchants our welcome kit. (Everything they need to get up and running!)
3. Login to the PAAY dashboard for an overview of all your merchant transactions.
