UNIVERSITY

UNIVERSITY deToledo

## **AGENDA**

- 1. Campus Safety
- 2. Construction & Future Campus Planning
- 3. Parking & Transportation
- 4. Interiors & Interior Wayfinding

## POLL TIME

#### Do you currently have a campus map?

- 1. Yes, and it is meeting all of my needs
- 2. Yes, and it is not meeting all of my needs
- 3. No

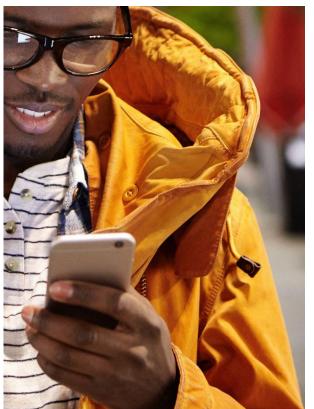

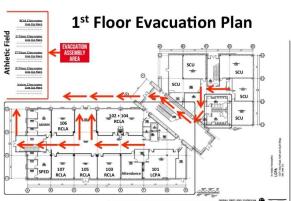

## THE PROBLEM

## Campus safety is a common concern for both students and parents.

- How accessible is your emergency information?
  - Do students know where to go to find it?
- How understandable is your emergency information?
- Do your students know the most well-lit paths on campus?

## Adding safety categories to your campus map

- AEDs
- Emergency phones
- Evacuation points
- Shelter locations
- Police department

Adding safety map overlays to show well-lit pathways

#### Adding tunnel overlays to your campus map

- Show students the safest walkways in extreme weather
- Highlight an unique attribute of campus

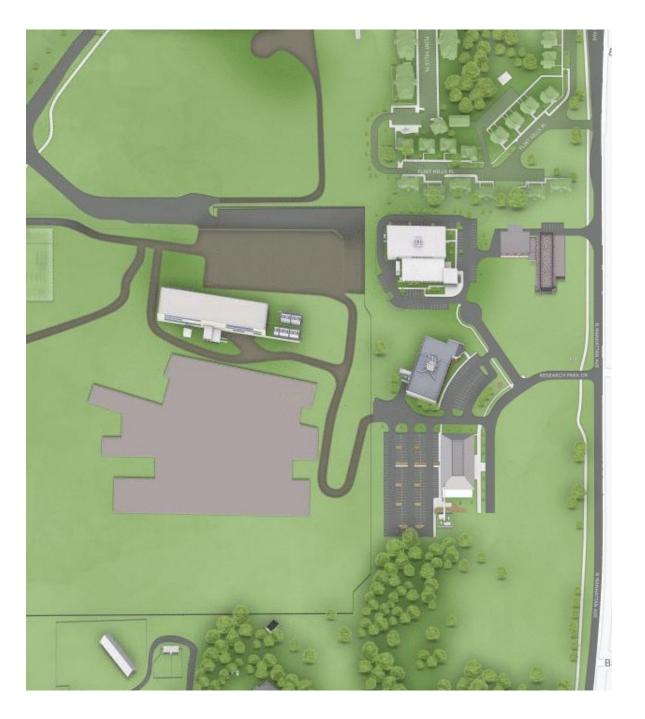

#### THE PROBLEM

# Nearly all of our clients at some point have construction or future campus planning initiatives

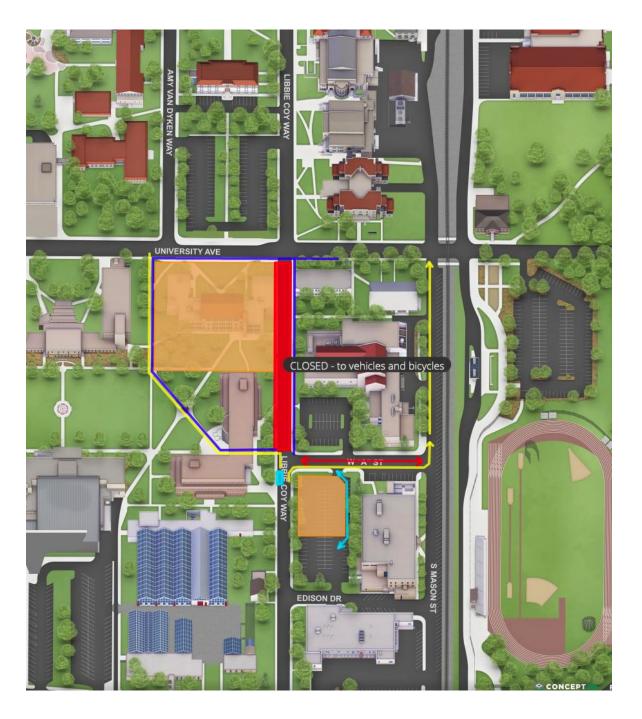

- This causes confusion and frustration
- There is no hindsight for the students/prospective students of what the finished project will look like
- Detour path signs are annoying

#### **Future Campus Category**

Show off what your campus *will* look like and give context to your construction.

#### **Construction Category**

Warn your students about lane closures and other construction on campus.

Godfrey Grad&Exec Ed Ctr

Address: 1275 E 10th St, Bloomington, IN 47405-1703 Building Number: BL450

2-Character Code: CG Constructed in: 2000

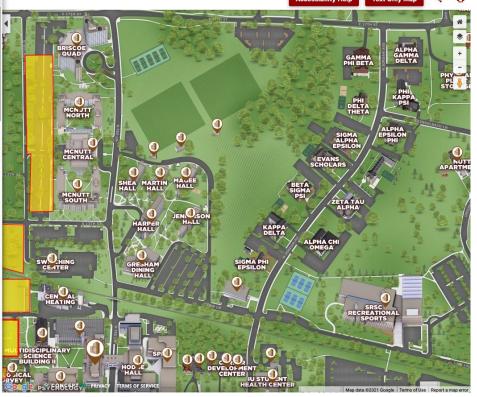

Original Architect: Beyer Blinder Belle Architects

The Godfrey Graduate and Executive Education Center, part of the IU Kelley School of Business, features elegant limestone and oak architecture, every imaginable technological advantage, and a two-story limestone walkway that connects to Hodgo Hall

#### Departments

- Building Services
- Business
- Dining Operations

#### **Named Spaces**

#### THE SOLUTION

#### **ESRI Arc/GIS Feed**

Ability to utilize existing data to populate on a more visually enhancing platform.

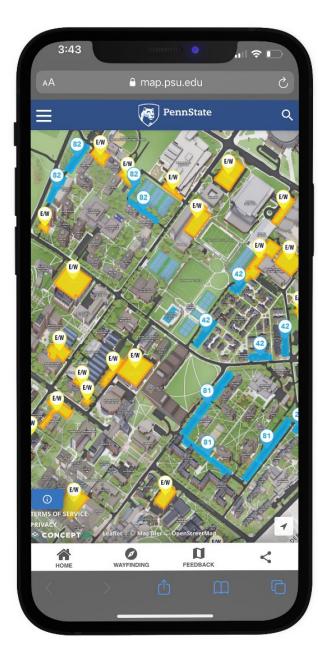

#### THE PROBLEM

## How do you show students and guests close parking and shuttle stops?

- Traffic builds up when guests search for parking, especially during events
- Show transit routes in a modern way

#### **Parking Category**

Let students and guests know where appropriate parking is located.

#### **Transit Feed**

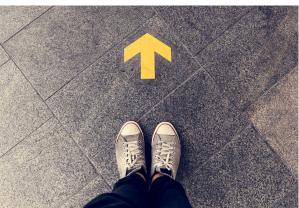

Give a real-time view of where your busses are in their route.

#### THE PROBLEM

## Almost all campuses have at least one building that's tricky to navigate

Schools have exams in different locations than their classrooms which can cause confusion before major tests.

#### **Interior Floor Plans**

Show off the details beneath the exterior.

#### **Interior Wayfinding**

Don't let the inside of a building confuse your students.
