CyberSmart

Protect your business against 99% of security threats with 24/7 monitoring

The Endpoint Application

What is the CyberSmart application?

The CyberSmart endpoint application is a light-weight piece of software that is installed on your clients' devices, this includes, PC's, laptops, mobiles and tablets. The application covers operating systems such as, Windows, Mac, IOS and Android.

What does the application do?

It monitors the five controls which make up the framework of Cyber Essentials. It will report back to your centralised portal every 15 minutes giving you complete visibility of your clients' devices and their respective compliance.

Why should your clients have the application?

Unfortunately, there is a common misconception as to what Cyber Essentials actually is, it is thought that it is just a certificate and something that only needs attention once a year, at the point of certification. As fantastic as this would be, it unfortunately is not the case. Cyber Essentials is a framework, a framework that is made up of five controls, without being able to ensure these five controls are in place and working as often as humanly possible, clients are not getting the benefit of what Cyber Essentials represents - a framework that has been proven to provide a protection rating of 99.3%.

Why should MSPs use the CyberSmart application?

The answer to this is simple because it makes your life easier. With the addition of the CyberSmart endpoint application you will gain full visibility to your clients' devices, software and their respective compliance against the Cyber Essentials framework without having to source this information yourself. You will also gain access to full reporting tools, a notification centre, smart policies and many more features to come in the near future.

Why CyberSmart?

CyberSmart know cybersecurity and government guidance better than most. After all, they were born from a GCHQ accelerator.

CyberSmart's expertise helps make the often complex and expensive process of Cyber Essentials certification quick, simple and painless.
