

Prevent CEO Fraud and Business Email Compromise

Heimdal Email Fraud Prevention

Prevent CEO Fraud and Business Email Compromise (BEC) with Heimdal's Email Fraud Prevention module.

CEO Fraud and BEC attacks are one of the fastest growing threats to businesses worldwide.

According to the FBI, the global cost of email fraud tops \$301 million a month.

BEC attacks, until now, have been notoriously difficult to detect and protect against due to the blended techniques that attackers are using. These techniques, such as: intel-gathering, phishing and vishing have been honed to win the victim's trust.

Heimdal Email Fraud Prevention module features:

- Monitoring of all emails alongside existing email filter solutions
- Detection of BEC, CEO fraud, phishing and advanced malware
- Finding imposter threats such as modified invoices
- Scans content of attachments in depth – looking at wording, IBAN, SWIFT, Account Numbers etc.
- Live monitoring and alerting from a 24/7/365 specialist fraud team
- Proactively alerts you if a historical email is detected as malicious
- Connect to external invoice approval system using APIs

Heimdal Email Fraud Prevention uses more than 125 vectors of analysis and is fully coupled with live threat intelligence to find and stop business email compromise (BEC), CEO fraud, phishing and complex malware. It works on top of any existing mail filtering solutions on Office 365 and Outlook for desktop.
