

**HORNETSECURITY**

Comprehensive protection for Microsoft cloud services

## 365 Total Protection

### What is Hornetsecurity 365 Total Protection?

Hornetsecurity's 365 Total Protection bundles are fully integrated with Microsoft 365 and combine the following Hornetsecurity modules:

#### 365 Total Protection for Business contains:

##### Spam and Malware Protection

The extensive features and thorough filtering mechanisms of Hornetsecurity's Spam and Malware Protection module keep your mailbox free of annoying and harmful spam, with a guaranteed 99.9% spam detection rate and 99.99% virus detection.

##### Signature and Disclaimer

Every outgoing email from a company contains both commercial and contact information; a uniform and legally compliant appearance is a basic requirement in the modern world. Create consistent email signatures and disclaimers for your entire organisation quickly and easily with Hornetsecurity's Signature and Disclaimer.

##### Email Encryption

Encryption of data has become a priority because of compliance requirements as well as the enactment of the Data Protection Act and GDPR. In a business environment, the exchange of sensitive information takes place primarily via email communication.

Email Encryption, from Hornetsecurity, ensures all-round encrypted exchange of emails for reliable, secure email communication.

#### 365 Total Protection for Enterprise contains everything in Business, as well as:

##### Advanced Threat Protection

Ransomware, spyware, and viruses manipulate or damage operational and production processes, which can cause considerable operational and financial damage to companies that are targeted. The Advanced Threat Protection component of Hornetsecurity detects even the most sophisticated cyber-attacks.

##### Email Archiving

Email Archiving from Hornetsecurity is legally compliant, fully automated and audit-proof and is the ideal solution for long-term and secure storage of important company information, data, and files. The solution is fully automatic with eDiscovery capability.

##### Continuity

The failure of a mail server often leads to significant operational issues and even, possibly, financial losses. If Hornetsecurity's automated monitoring detects that the customer's mail server has failed the Email Continuity Service is immediately activated.
