

**HORNETSECURITY**

Making your emails safe

Spam and Malware Protection

What is Hornetsecurity Spam and Malware Protection?

Hornetsecurity's Spam and Malware Protection service is an innovative cloud-based email filtering tool that protects users from unwanted spam and malicious emails, using a constantly evolving and multi-layered filtering engine.

Hornetsecurity's Spam and Malware Protection Service offers 99.9% guaranteed spam and virus detection. The service provides advanced and comprehensive protection against spam and malware threats, the leading causes of cyber-attacks.

How does it protect?

Hornetsecurity's multi-layered filtering system, which operates 24/7, blocks malicious emails before they reach the user, by using 18 different anti-virus and phishing filters. The filtering system resides in the cloud, between the sender and the recipients mail server, ensuring no malicious emails reach an end-user's email system.

Why use Hornetsecurity Spam and Malware Protection?

The main aim of Hornetsecurity's Spam and Malware protection module is to ensure that users are fully protected, and they can spend their time

focusing on their day-to-day work rather than worrying about malicious emails.

When you use Hornetsecurity services, you can have peace of mind from knowing that you are using state-of-the-art technology from a global company with over 14 years of experience in the cybersecurity industry.

Features and Benefits:

- Guaranteed 99.9% Spam and Virus detection rate
- Link Tracking protects users from malicious URLs and Phishing attacks
- Simplified quarantine report allows users to manage their own spam and infomail
- Hardcode rules for end users via the Content and Compliance filters
- Easily configurable SPF/DKIM/DMARC controls
- Reputational protection via outbound filtering
