

Top-rated password manager for protecting your business

Keeper MSP & Admin - What's included?

Keeper MSP includes:

- Encrypted vault for every user
- Folders and subfolders for users but also shared team folders
- Access from unlimited devices
- Policy engine and enforcements
- Security Audit
- Advanced Reporting with Alerts Module
- Team management with ability to automate
- Basic and advanced Two-Factor Authentication (including SMS, TOTP, smartwatch, FIDO U2F, DUO, RSA)
- Single Sign-On (SAML 2.0) authentication
- Active Directory and LDAP sync
- SCIM and Azure AD provisioning
- Email auto-provisioning
- Command line provisioning
- Developer APIs for password rotation and backend integration
- BreachWatch – constantly scanning employees' Keeper Vaults for passwords that have been exposed on the dark web with automatic alerting allowing the organisation to take swift action
- 1TB Storage included as standard with 256-bit AES encryption using record-level keys. Files can be easily saved and securely shared with other Keeper users, from vault-to-vault

Keeper MSP Admin includes:

- MSP Admin Console to manage customer base, to generate end user reports relating to Security Audit and BreachWatch
- License pooling ability to distribute licenses
