

Your Network. Your Rules.

Untangle NG Firewall

Product Overview

Untangle NG Firewall is a multi-generational, enterprise-grade, unified threat management solution for small businesses and distributed campuses. As a scalable solution, Untangle NG Firewall provides SMBs with security and visibility of the complete network and all devices connected to it, giving administrators an eagle-eye view of activities on the network. From content filtering to advanced threat protection, VPN connectivity to application-based shaping for bandwidth optimisation, NG Firewall delivers a comprehensive network security platform for organisations in any industry.

NG Firewall: Multi-Layered Network Security

Protect: Security at the gateway keeps everything on the network safe and secure.

- Firewall
- IPS
- Encryption
- Control & visibility from anywhere

Filter: Next-generation filtering provides superior connectivity and performance of business-critical applications.

- Web filter
- Application control
- Bandwidth control

Perform: Ensure Quality of Service for the entire network with management and failover protection.

- Bandwidth management
- WAN Failover
- WAN Balancing
- Web Cache

Connect: Remote locations and employees stay securely connected to the network regardless of where they are connecting from.

- Branch offices
- Remote employees
- Wi-Fi networks

Manage: Remote management via the intuitive app-based interface keeps administrators in control of the network and connected devices.

- Accessible from anywhere
- Centralized configuration and management
- Integrated Endpoint Protection (Malwarebytes and Webroot)

Why Customers Choose Untangle NG Firewall

- Enterprise grade - NG Firewall has enterprise grade functionality but built specifically for SMBs and distributed enterprises with limited IT resources.
- Scalability - Advanced remote management supports customers as their needs grow and their business expands.
- Flexible deployment - Deployment options are available to fit into existing network infrastructure, and zero-touch deployment of Untangle hardware appliances makes it easy to deploy new hardware when needed.
- Licensing simplicity - Licensing options are flexible and scalable for smaller and distributed networks.

Untangle NG Firewall Delivers

- An intuitive interface for deployment in any environment
- True Zero-Touch provisioning to manage your deployments from anywhere
- In-depth reporting for full compliance and regulatory standards
- Multi-layered security to easily scale to your network security needs
- Comprehensive, real-time visibility of every device protected on the network

Comprehensive Security at the Gateway

Proactively stop malware, hacking attempts, phishing schemes and other threats before they reach users' devices.

Next-Generation Filtering

Get a handle on every rogue application, encrypted web request, malware distribution point, drive-by malvertising attempt, and rash of spam.

Superior Connectivity & Performance

Meet the challenges of a remote workforce, branch offices and guest Wi-Fi. Keep users and data safe regardless of location or level of access. Balance competing priorities, ensure Quality of Service (QoS), and maximise uptime.

Deep Analysis and Insights

Gain valuable insights from database-driven reports without the need for a separate appliance. See the network status on the dashboard, ensure compliance with full event logs, and get notifications of threats, anomalies or unusual user behaviour with alert rules.
