

Implementing Microsoft Solutions for FinServ

Teachers Credit Union

Customer Success Story

Value. Attention to detail. Industry knowledge.

Client Name:
Teachers Credit Union

Teachers Credit Union has grown to 54 locations and more than 300,000 members -- making TCU the largest credit union in Indiana. They deliver personal attention, convenience, and access to financial professionals through their full-service centers and CO-OP shared branch network of over 5,600 locations.

KiZAN has developed specific communication processes to work with TCU to help oversee the entire Microsoft stack. Because of the rigid compliance standards of financial institutions, we proactively address potential areas of concern through thoughtful and candid consultation and pay rigorous attention to scoping projects in granular detail. We press to understand necessary outcomes and work across siloed divisions to deliver impactful results.

"We've worked with partners in the past and the relationships did not go well for various reasons. KiZAN has completely restored my trust in partner relationships."

Jeffery Diehl
Sr. Director of Infrastructure Services

Sample projects:

- ▶ Exchange migration support
- ▶ Office 365 Governance and Security
- ▶ SharePoint Modern Communication
- ▶ SharePoint Online Migration
- ▶ Azure Scaffolding
- ▶ SCCM
