

Microsoft 365 Managed Services

Our Microsoft 365 Managed Service has been built to help you optimize your investment in Microsoft 365. Remove the burden and stress of managing the cloud tenant components and receive regular reports for utilization, as-needed service support activities, and routine maintenance activities outlined below.

Proactive Maintenance. Reactive Support.

Improve your process maturity level by relying on proven methodologies to manage and maintain your tenant. This service is primarily for organizations that want to ensure their M365 environment is managed with proactive maintenance and reactive issue management so that internal resources can focus on other business-critical activities.

KiZAN utilizes a standard managed services onboarding process that will outline the key action plan, from contract signature through the first Quarterly Business Review (QBR). KiZAN will work directly with your key contacts to ensure awareness of the engagement activities and outcomes in all phases.
