

COGNIBOX™

ARE YOU EQUIPPED TO FULFILL YOUR CONTRACTOR MANAGEMENT SYSTEM'S GOALS?

CONTRACTOR PREQUALIFICATION IS JUST THE BEGINNING.

Now, safety prevention needs to enact controls (PPEs, policies, authorizations, environmental instructions, lifesaving rules, etc.) relevant to the specific hazards of the job and the hiring client's unique work environment.

Risks materialize once contractors show up on site.

Go the extra mile.

Measure your contractor compliance against the assigned task.

ADD WORK AND TASK MANAGEMENT CONTROL

Smart generation of requirements on work permits and full integration with your site access control system.

Automatic compliance checks every time a worker crosses your gate.

Protect your assets and maintain workplace safety by ensuring contractor reliability and work quality.

With Cognibox's Analysis & Tasks module, contractors' expectations will be crystal clear from the get-go.
