

Are you maximizing your use of Microsoft's security capabilities?

If not, we can help.

With BlueVoyant's Microsoft security consulting and deployment services, you don't need to be an expert to take your security and compliance posture to the next level. Our Accelerator services are designed to get you up and running quickly and to maximize your investment in Microsoft Azure Sentinel and 365 Defender security technologies.

How do I get started? Microsoft Security Accelerators from BlueVoyant

Pick one or both of our Accelerator services below. We will perform detailed analysis of your environment(s) and provide actionable security insights. What's included: A detailed assessment of your risks, guidance on how best to leverage Microsoft-powered solutions and/or deployment & configuration assistance based on your unique situation.
