

# A Wonderful Job Description

Role - Freelance Front End Developers

Employment - Contract

## **Agency Overview:**

Wonderful is an agency that leads digital transformation in user and customer experiences. Our team of UX designers, strategists, developers, creatives and digital marketers take complex digital problems and deliver Wonderfully simple solutions for some of the worlds biggest brands. With clients including KLM Airlines, GE Healthcare, RS Components, Mind, HSBC, Diageo and Dreamland there's plenty of exciting projects to work with.

Wonderful has a culture full of energy and aspiration. With collaboration as a core value, we have built a team that blends skill sets, viewpoints and expertise to deliver the highest standard of work, work that balances creativity and technology through a clear agile, UX framework. We've worked hard to make sure that those working at Wonderful are part of a team doing meaningful work; we even work from our own coworking space, WonderHub, a place built to inspire innovation and collaboration.

We're looking for a freelance frontend PHP developer to work remotely or in our Kent office, with three or more years commercial experience and proven ability to take intricate design visuals and build great websites.
