Vertical, multistage centrifugal pump with inlet and outlet ports on same the level (inline). The pump head and base are in c – all other wetted parts are in stainless steel. A cartridge shaft seal ensures high reliability, safe handling, and easy access service. Power transmission is via a rigid split coupling. Pipe connection is via oval flanges with internal NPT threads.				
	The motor efficiency is classified The motor includes a frequency the motor speed, which again efficiency	e, fan-cooled, permanent-magnet, synchronous motor. d as IE5 in accordance with IEC 60034-30-2. converter and PI controller in the motor terminal box. This enables continuously variable control nables adaptation of the performance to a given requirement. or terminal box features a four-inch TFT display, push-buttons and the Grundfos Eye indicator.		
	The push-buttons are used to na	d user-friendly interface to all functions. avigate through the menu structure to access pump and performance data on site and enable ell as setting of pump to "Min." or "Max." operation or to "Stop".		
	Communication with the pump is also possible by means of Grundfos GO Remote (accessory). The remote control enables a settings as well as reading out of a number of parameters such as "Actual value", "Speed", "Power input" and total "Power consumption".
