Product No.: 99341004	
- all other wetted parts are in stai	mp with inlet and outlet ports on same the level (inline). The pump head and base are in cast iron nless steel. A cartridge shaft seal ensures high reliability, safe handling, and easy access and a a rigid split coupling. Pipe connection is via oval flanges with internal NPT threads.
The motor efficiency is classified a The motor includes a frequency c the motor speed, which again ena	, fan-cooled, permanent-magnet, synchronous motor. as IE5 in accordance with IEC 60034-30-2. onverter and PI controller in the motor terminal box. This enables continuously variable control of ables adaptation of the performance to a given requirement. terminal box features a four-inch TFT display, push-buttons and the Grundfos Eye indicator.
The display gives an intuitive and The push-buttons are used to nav	user-friendly interface to all functions. <i>i</i> gate through the menu structure to access pump and performance data on site and enable II as setting of pump to "Min." or "Max." operation or to "Stop".
Communication with the pump is settings as well as reading out of consumption".	also possible by means of Grundfos GO Remote (accessory). The remote control enables further a number of parameters such as "Actual value", "Speed", "Power input" and total "Power
<ul> <li>"Power on": Motor is runni</li> <li>"Warning": Motor is still run</li> <li>"Alarm": Motor has stoppe</li> </ul>	e operating panel provides visual indication of pump status: ng (rotating green indicator lights) or not running (permanently green indicator lights) nning (rotating yellow indicator lights) or has stopped (permanently yellow indicator lights) d (flashing red indicator lights).
and outputs are required:	f inputs and outputs enabling the motor to be used in advanced applications where many inputs
