		was with inlat and autiat north an arms the level (inline). The summing and and have out in particum		
	– all other wetted parts are in sta	ump with inlet and outlet ports on same the level (inline). The pump head and base are in cast iron ainless steel. A cartridge shaft seal ensures high reliability, safe handling, and easy access and		
	service. Power transmission is v	ia a rigid split coupling. Pipe connection is via combined ANSI-JIS flanges.		
		e, fan-cooled, permanent-magnet, synchronous motor.		
		a las les in accordance with IEC 60034-30-2.		
		converter and PI controller in the motor terminal box. This enables continuously variable control of		
	the motor speed, which again er	ables adaptation of the performance to a given requirement.		
		or terminal box features a four-inch TFT display, push-buttons and the Grundfos Eye indicator.		
	The display gives an intuitive an	d user-friendly interface to all functions.		
	The push-buttons are used to na	avigate through the menu structure to access pump and performance data on site and enable		
	setting of required setpoint as w	ell as setting of pump to "Min." or "Max." operation or to "Stop".		
	Communication with the pump is	s also possible by means of Grundfos GO Remote (accessory). The remote control enables further		
	consumption".	f a number of parameters such as "Actual value", "Speed", "Power input" and total "Power		
	The Crundfee Eve indicator on t	he operating panel provides visual indication of pump status:		
		ne operating panel provides visual indication of pump status: ning (rotating green indicator lights) or not running (permanently green indicator lights)		
		unning (rotating yellow indicator lights) or has stopped (permanently yellow indicator lights)		
		ed (flashing red indicator lights).		
		of inputs and outputs enabling the motor to be used in advanced applications where many inputs
