are in high-grade stainless steel	ump with inlet and outlet ports on same the level (inline). Pump materials in contact with the liquid . A cartridge shaft seal ensures high reliability, safe handling, and easy access and service. Power oupling. Pipe connection is via combined DIN-ANSI-JIS flanges.		
	e, fan-cooled, permanent-magnet, synchronous motor. d as IE5 in accordance with IEC 60034-30-2.		
The motor includes a frequency the motor speed, which again er	converter and PI controller in the motor terminal box. This enables continuously variable control of nables adaptation of the performance to a given requirement.		
The operating panel on the moto	or terminal box features a four-inch TFT display, push-buttons and the Grundfos Eye indicator.		
The display gives an intuitive and user-friendly interface to all functions.			
The push-buttons are used to na setting of required setpoint as w	avigate through the menu structure to access pump and performance data on site and enable ell as setting of pump to "Min." or "Max." operation or to "Stop".		
Communication with the pump is settings as well as reading out o consumption".	s also possible by means of Grundfos GO Remote (accessory). The remote control enables further f a number of parameters such as "Actual value", "Speed", "Power input" and total "Power		
The Grundfos Eve indicator on t	he operating panel provides visual indication of nump status:
