	The Grundfos MAGNA3 circulator pump is the ideal choice for almost any building project – old or new. With its unrivalled energy efficiency, all-encompassing range and built-in communication capabilities, MAGNA3 is ideal for engineers and specifiers looking to create high-performance heating and cooling systems.					
	The pump is maintenance-free due to the canned-r integral unit without shaft seal and with only two ga liquid.	otor type design skets for sealing	 n. This also means that pump and motor forr g. The bearings are lubricated by the pumpe 	m an ed		
	MAGNA3 features an intuitive display and allows you to connect wirelessly with the Grundfos GO Remote app, giving you access to advanced reporting and monitoring.					
	The pump includes fieldbus communication via CIM modules as well as analog and digital inputs and configurable relays.					
	Control features include AUTOADAPT and FLOWADAPT. FLOWADAPT which reduces the need for throttling valves, thus cutting costs on system components.					
	MAGNA3 is the superior choice for a wide range of heating and cooling applications, including:					
	 Mixing loops Heating surfaces Air conditioning surfaces 					
	 Ground-source heat pump systems Smaller chiller applications. 					
	MAGNA3 is a single-phase pump and characterised by having the controller and control display integrated in the control box. The pump also has a built-in differential-pressure and temperature sensor.					
	The pump housing is available in both cast-iron and carbon-fibre reinforced, the bearing plate and rotor made of aluminium. The power electronics are air-o	cladding are ma		is		
	MAGNA3 incorporates a 4-pole synchronous, perm characterised by higher efficiency than a conventio controlled by an integrated frequency converter.
