CLIMB

An orange silhouette of a person climbing a vertical bar, positioned on the letter 'L' of the word 'CLIMB'. A blue arrow points towards the 'C' from the left, and a dashed blue line curves around the top and right sides of the word.

Inventory Counting Considerations

Inventory Counting is the last tool you should use

What's first?

- All items are in the system
- All items have accurate Retail and Costs
- You are no longer stickering items – you are labeling shelves
- You are processing price update files where possible
- You are effectively using Purchasing & Receiving
- You are using Product reports to make business decisions

Inventory Counting Considerations

Best Approach

It Depends. There is no one-size fits all approach

Perpetual vs Annual

Perpetual. At least twice a year but more is better

Basic vs Advance Inventory Control

If on Advanced IC, make sure the Holding Tank is empty

Bin Locations or Not

If you have a small front end, Bin Locations aren't overly useful
