DESCRIPTION AND USE

Dober D16 is an easy to use to use, all liquid additive system used to blend heavy-duty, extended life coolants meeting ASTM D6210 standards. This additive package contains extended life corrosion inhibitors based on organic acids and provides maximum protection against damaging rust and corrosion in engine cooling systems. This inhibitor package is free of nitrite, amine, phosphate and silicate. This patent pending technology does not use 2EH acid nor any other organic acid that is aggressive to hoses and gaskets. Coolants made from D16 are suitable for use in modern heavy-duty diesel engines.

This additive package when blended with ASTM E-1177 grade glycol and following Dober's blending procedure is designed to meet the following industry specifications:

ASTM D-6210 Specification for HD Coolant Military Specification CID A-A-52624
ASTM D-3306 Specification for LD Coolant

RECOMMENDED APPLICATIONS

D16 is formulated for use in heavy-duty applications for on-highway, off-road, marine, agricultural, mining, and construction equipment.

It is compatible with major coolant types for top-off and full-service.
