

# The **SSCOR** VX-2

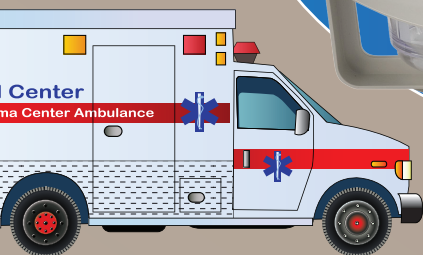

Designed for EMS as an onboard or portable suction unit.

The universal canister holder accommodates many different canisters.

The variable regulator allows the negative pressure to be adjusted for adults or pediatrics.

The battery display uses LED lights to indicate the battery level and other conditions.

**BATTERY BACKUP**  
**45**  
Minutes  
(+/- 10%)  
**RUN TIME**

When mounted, the unit is essentially an onboard system.

When removed from the bracket, the VX-2 becomes a portable aspirator.

**SAE J3043 COMPLIANT**

SAE J3043 compliant when used with a 1200cc Bemis canister and the SSCOR #230-00003 Onboard Canister Clip.

The mounting bracket both charges and powers the VX-2.

The VX-2 can be released from the bracket with one hand.

Take it right to the patient's side or anywhere suction is needed.
