

National Day of Action demands affordable internet for everyone in Canada

Advocates, academics, and companies come together to call on federal government and CRTC to deliver lower prices

March 16, 2021 – Today, over two-dozen civil society and social justice groups, policy experts, activists, independent ISPs, and thousands of Canadians are coming together for Canada’s first [Affordable Internet Day of Action](#). One-year into the pandemic, the critical role of the Internet is clear – but for many, remains out of reach or far too expensive.

The Day of Action is an collaborative effort to spotlight the importance of this issue, and highlight potential solutions the federal government could adopt to put an end to Canada’s Internet affordability problem.

Highlights of the Day include:

- A live digital event from 1pm - 4:40 pm ET (register [here](#))
- An [open letter](#) to Prime Minister Trudeau, Minister Champagne and CRTC Chair Scott from select participants
- A selection of advocacy actions from participating groups to support members of the public to directly email and call their MPs to demand action.

Today’s schedule and complete list of participants are available at affordable-internet.ca.

		OpenMedia National Capital Freenet Public Interest Advocacy Centre CIPPIC
4:30	Closing Comments	OpenMedia

Quotes:

“ACORN Canada is joining this national day of action because of the federal government's complete failure to put people over the profits of the big telecommunication companies during this pandemic. A Recent (2019) report from ACORN Canada shows only 80% of low-income people with household incomes under \$30,000, only 80% had home internet. Of the 78 respondents without home internet, 72% identified cost as the main reason. 65% of respondents said they had to sacrifice things like food, medication to afford their home internet.” - **Marva Burnett, National President, ACORN Canada**

“Cloudwifi is passionate in our belief that the Internet should be classified as an essential utility and all Canadians should have equal access to it, regardless of one's income level. No family should have to choose between paying their Internet bill and putting healthy food on the table.” - **Gary Kenning, Co-Founder, Cloudwifi**

“Getting everyone in Canada connected at a price they can afford has never been more important. Yet despite years of promises, our government shows no sign they take the problem seriously. The number of groups participating in this day of action should be the sign that the status quo is not good enough. A comprehensive strategy from our government for securing affordable access for all Canadians to wireless and home connectivity is needed— one that accounts for and avoids the mistakes of past programs.” - **Laura Tribe, Executive Director, OpenMedia**

“Simbi is pleased to support the Day of Action as more than 100,000 learners, 31% of which reside in rural communities, across Canada rely on affordable internet access to improve their reading skills and create global impact using Simbi's online reading platform.” - **Alex Gillis, Co-Founder, Simbi**

“Delays in implementing fair wholesale rates have resulted in consumers subsidizing the huge profits of the largest and most powerful and profitable telecom companies in Canada. The government has stood by and watched this happen at a time when competition and fair pricing for internet is needed more urgently than ever.” – **Andy Kaplan-Myrth, Vice-president of Regulatory and Carrier Affairs, TekSavvy**

“Imagine these pandemic months without internet, or with slow internet, or having to choose between food, and the high-speed internet you need to keep your job, or your child online with school. This is real life for hundreds of thousands, if not millions, of Canadians. When Canada’s major city, Toronto, feels it has to jump into the breach, and build its own network to ensure none of its residents have to suffer in this way, we know we have a failed system. It can be fixed. Let’s fix it now!” – **George Burger, Co-Founder, VMedia Inc.**
