

# ClusterOps

## Kubernetes Enablement Platform

A fully managed platform for running reliable, scalable, and secure Kubernetes clusters

### WHY FAIRWINDS

#### Accelerate time-to-market

Establish timeframes that meet or exceed your business partners' expectations. Avoid long ramp-times as well as costly trial and error breakdowns that can delay projects and disrupt business plans.

#### Supplement your team with trusted experts

Gain immediate access to highly skilled SREs with years of best practices insights. Cut out the time spent recruiting from the scarce talent pool.

#### Deploy with confidence

Rely on Fairwinds to keep your applications highly available, scalable, and secure. Fairwinds' production-grade infrastructure, open source software, and expertise have been battle-tested across hundreds of production environments.

Every step of the way, they've trained our team and increased our knowledge base, allowing us to focus on building services instead of maintaining infrastructure. Their support has been invaluable.

— Sr. Vice President of Software, Zonar Systems

You get an entire team of pro Kubernetes DevOps engineers for the price of one DevOps employee.

— Sr. Software Engineer, ZyBooks

### OUR FULLY MANAGED OFFERING
