

MORE COMFORT FOR YOU. NO COMFORT FOR PESTS.

GET HEAT-BEATING, COLD-STOPPING, PEST-KILLING PROTECTION WITH COOPER® INSULATION SERVICE.

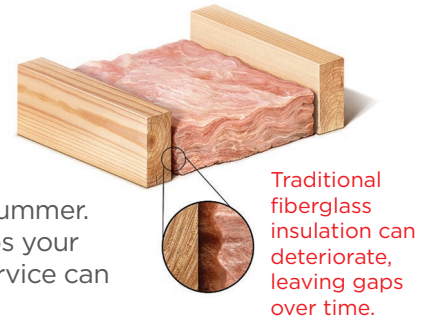

Drafts, cold floors, fluctuating temperatures and high utility bills could be signs that your home's insulation is insufficient. And that can make your home not so homey. Take comfort! Cooper Pest Solutions fights heat and cold with ENERGY STAR® certified attic and crawl space insulation* that provides greater protection, reduces wear and tear on your heating and air conditioning systems and lowers your heating and cooling costs. And, while you'll be more comfortable, pests won't. That's because our attic insulation is specially treated to help safely control 11 common pests on contact.

INSULATION SERVICE

DON'T LET POOR INSULATION TAKE YOU OUT OF YOUR COMFORT ZONE.

Traditional fiberglass insulation has inherent gaps and degrades over time, causing your home to lose valuable heat in winter and gain unwanted heat in summer. That forces your heating and air conditioning systems to work harder and keeps your family members from enjoying the comfort they deserve. Cooper Insulation Service can bring a new level of protection, making your home easier to heat and cool.

IN THE ATTIC

TAKE CLIMATE CONTROL TO THE HIGHEST LEVEL.

For attic spaces, your Cooper insulation technician applies ENERGY STAR certified cellulose insulation on top of your existing insulation or as a replacement. It takes less of our cellulose insulation to achieve the desired R-value than it does batted or blown-in fiberglass insulation. High efficiency. High satisfaction.

KEEP COMFORT IN AND PESTS OUT.

Cooper attic insulation is specially treated to safely and effectively control 11 types of common household pests on contact[†], including:

- Cockroaches
- Silverfish
- Ants
- Earwigs
- Crickets
- Sow Bugs
- Darkling Beetles
- Millipedes
- Centipedes
- Booklice
- Termites

It's the perfect complement to a comprehensive pest control plan.

PLUS, YOU CAN TAKE COMFORT IN ALL THESE BENEFITS:

- Is made from 87% recycled materials
- Resists mold and mildew, retards flame, reduces noise
- Backed by a manufacturer's lifetime warranty[‡]

IN THE CRAWL SPACE

FIGHT COLD AND MOISTURE FROM BELOW.

Our crawl space and basement insulation is a lightweight, thermal and acoustical insulation made of long resilient fibers. Expertly fitted between the joists

under your floorboards, it creates a tight barrier to help shield your home from cold ground temperatures in winter and from moisture year round.

SCHEDULE YOUR FREE HOME INSULATION EVALUATION TODAY.
