

DON'T WAIT FOR TERMITE DAMAGE. PREVENT IT.

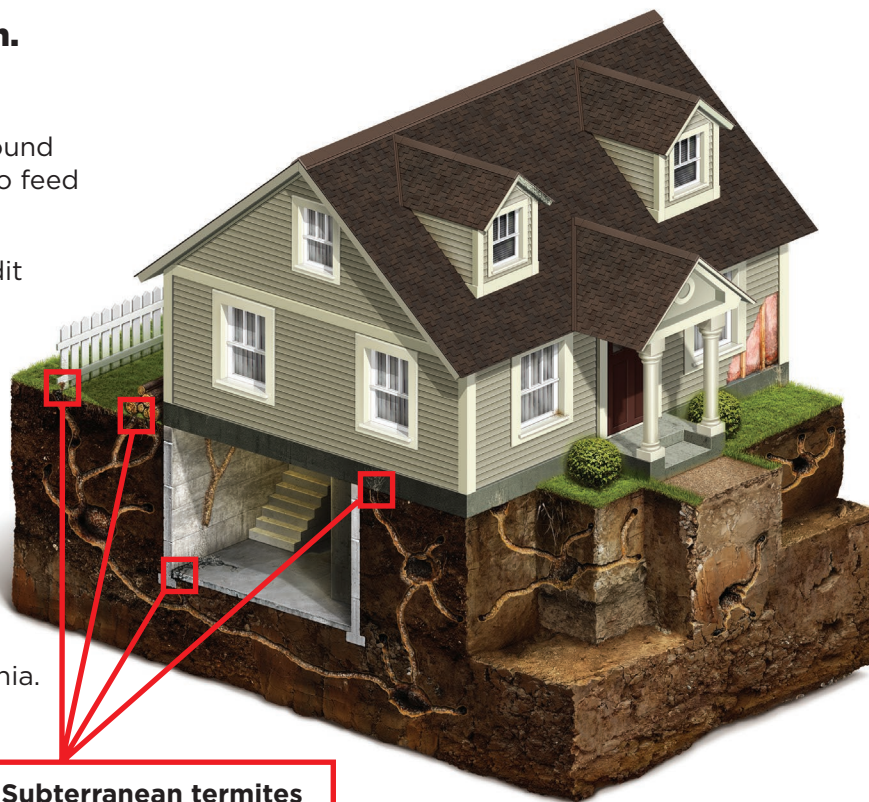

Defend your home with effective, ongoing termite protection from Copper Pest Solutions.

Termites cause billions of dollars in property damage each year, costing individual homeowners thousands. That's because termite activity often goes undetected.

THE THREAT.

**Termites Are Silent. They're Hidden.
And They Feast On Homes 24/7.**

- Subterranean termites nest in the soil around and below the home and travel upward to feed on the home's wood structure, unseen.
- They can slip into cracks as thin as a credit card and eat through your home's structure unchecked.
- There can be up to a million termites in a single colony.
- Often the damage is hidden behind walls. In older homes, what looks like age can actually be serious termite damage in plain sight.
- Termites are determined eaters, feasting year-round in New Jersey and Pennsylvania.

THE SOLUTION.

Ongoing Prevention From Cooper Pest Solutions.

Termites can't damage your home if they can't reach it. That's why Cooper works relentlessly to help prevent termite infestation.

HOW IT WORKS:

- Cooper strategically installs a series of termite bait stations in the ground around your home.
- Bait stations intercept termites with a bait they prefer over wood in your home.
- Once termites have fed on the bait, they carry the control agent back to the colony nests and share it with other termites, eliminating the colony.
- Because termites are always active, we provide bi-annual inspections to ensure your home is protected year after year.

DON'T WAIT UNTIL THE DAMAGE IS DONE. PREVENT IT.

Call Cooper Pest Solutions at **1-800-949-2667** to set up a free inspection.
