

# Ergonomic Assessments

*Provided by Briotix Health*

Briotix Health is the world-wide leader in onsite and virtual ergonomic intervention. We offer a wide-variety of ergonomic resources to best suit your employees and company needs while building long-lasting results.

- Create ergonomically-friendly workstation
- Reduce workplace injuries and workers' compensation claims
- Save time and money for both the employee and company

» **Onsite Ergonomic Assessment:** Ideal for employees that are showing signs of early discomforts or musculoskeletal strain symptoms. One-on-one intervention with a Briotix Health provider includes:

- A full ergonomic risk assessment with comprehensive reporting
- Evaluation of the employee's desk set-up and work area
- Adjustment of equipment to improve employee biomechanics
- Identification of tools, equipment, and space modifications

» **Virtual Ergonomic Assessment:** Ideal for new or return-to-work employees, and remote or "hard to reach" locations. Virtual one-on-one assessment between Briotix Health provider and your employee via a web-meeting includes:

- An ergonomic risk assessment with comprehensive reporting
- Evaluation of employee's desk set-up and work area
- Virtual assistance with adjustment of workstation to improve employee biomechanics

» **360Me Ergonomic Assessment:** Ideal for employers looking to empower employees in self-resolution through access to online training, risk assessment, and focused self-help solutions related to their workstations. Self-administered ergonomic assessment includes:

- Individual self-assessment and discomfort questionnaire
- Employee driven, real-time equipment and workspace suggestions
- Identification of tools, equipment, and space modifications

» **Onsite Ergonomic Sweeps:** Ideal for employees that have recently moved, renovated, and/or employers who want to provide quick ergonomic recommendations to a large group of employees. Sweep-style one-on-one reviews of multiple employee workstations with a Briotix Health provider include:

- Real-time equipment and workspace ergonomic suggestions
- Best-practice biomechanics coaching
- Brief documentation and recommendations

Serving clients in 50 states and  
63 countries around the world
