# SOFTPHONE APP

The softphone app allows you to make and receive calls from anywhere over 3G, 4G and Wi-Fi at local rates while using your existing landline number. Remain productive from wherever you are by staying connected from the convenience of your phone. Easy to use, flexible, and secure.

## KEY FEATURES

### Geographic flexibility and mobility

Stay connected from anywhere at any time on any internet-enabled device

### Cost-effective

Communicate globally and pay locally with local call rates

### Best-in-class call quality

There's no need to worry about poor cellular signal when using Wi-Fi

### Quick and easy set-up

Simply download from the Google Play & App Store and start using it straight away

### Full contact integration

Save time and effort of manually inputting phone numbers by syncing contacts

### All-in-one-solution

Save the hassle of sourcing a separate supplier. We've got everything covered
