Fedmine Selected as Key Company/Manufacturer Operating in the Global Federal Government Software Market by QYResearch

Along with *Salesforce* and *Oracle*, *Fedmine* has been recognized in a research report published by QY Research as a key company/manufacturer operating in the global federal government software market, with Fedmine being one of the only small businesses to make the list.

Rockville, MD – August 31, 2020 – Founded in 2004, Fedmine is the fastest growing federal business intelligence platform for organizations seeking real-time information on federal contracts and business opportunities. It is the most dominant SaaS platform on federal spending data and is widely accepted as the most reliable and accurate source on information that relates to federal spending. With an astounding track record that boasts many other firsts, it is now considered to be the largest library of ready-to-run federal spending reports on the Internet. Over the last 5 years Fedmine has operated strategically to stay ahead of the competition. To be included as a key company operating in the Global Federal Software space speaks to the rising prominence of Fedmine in the federal sector.

The [research report](#) reviews the potential development openings that exist in the federal spending worldwide market and lists the major players in the regions and their respective market share on the basis of global revenue. The report is broken down on the basis of research procedures procured from historical and forecast information. The global Federal Government Software market is relied upon to develop generously and flourish as far as volume and incentive during the gauge time frame.
