

RELEASE NOTES

Resend ExpressVisit Invite

Summary

ExpressVisit now allows the ability to resend an invite so that the user can be sent a new and updated link in the event that the patient got locked out.

Problems Solved

- Patient locking their token and not being able to enter back into the visit.
- Patient not receiving or seeing the email or text and needing to be sent the invite again.

Feature Overview

This feature will impact the following areas:

- The invite patient modal in ExpressVisit

Invite Participants

Provide an email address or phone number

Enter email or phone Send Invite
