

RELEASE NOTES

Search by Practice Name

What is it?

The switch practice dropdown in header now supports searching for a practice by the practice name.

Why is it useful?

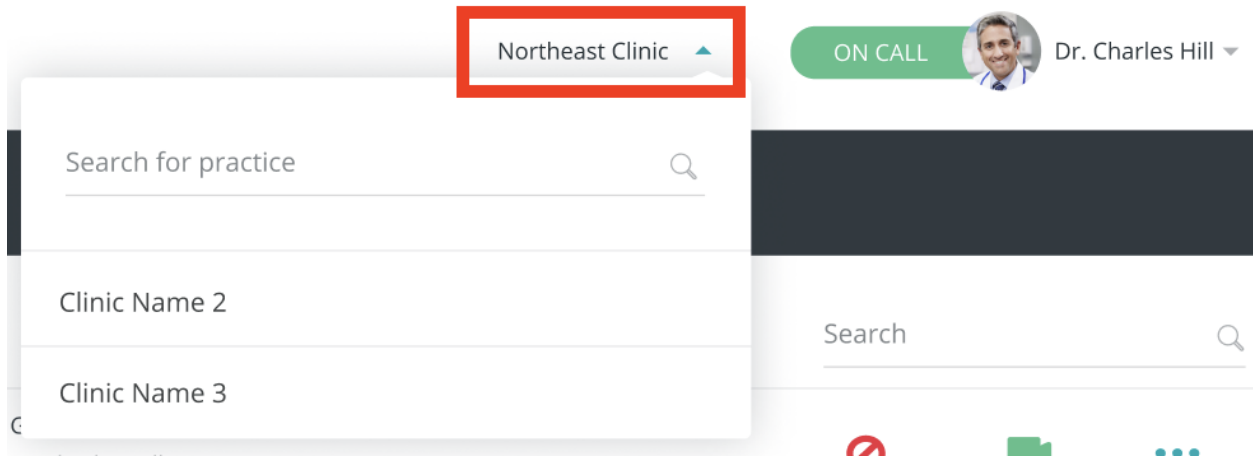

For users that are associated with many practices, not all practices will default when the switch practice dropdown displays. Therefore, utilizing search to more quickly find the necessary practice will save time.

Feature Overview

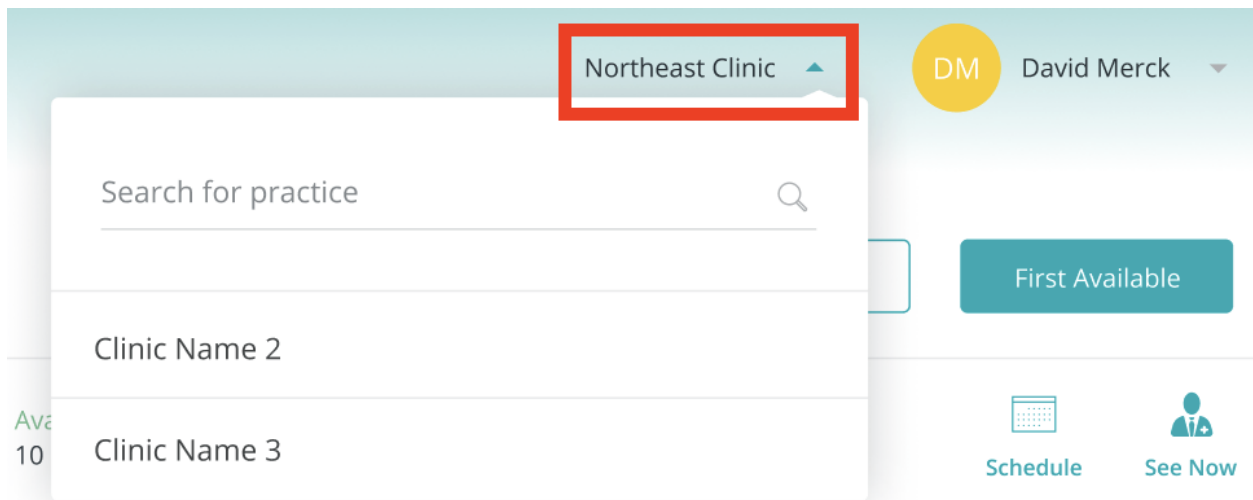

The user will experience the search functionality whenever the user follows these steps:

1. User clicks on the practice name in the header

Clinical user view:

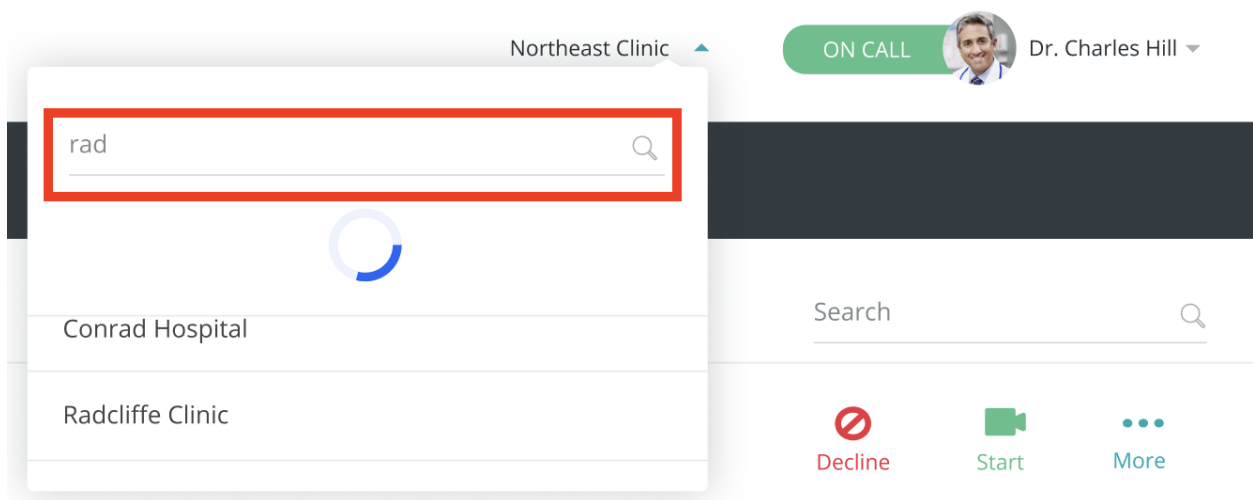

Patient view:

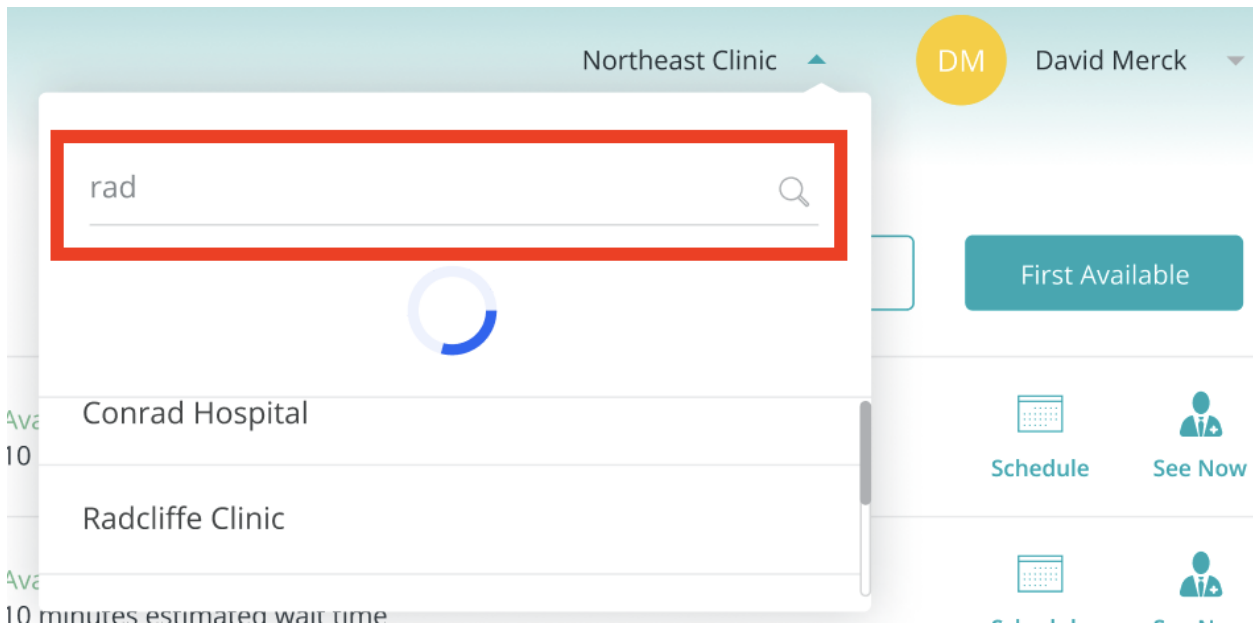

2. User types in the search bar and the practice's displayed update based on what is searched

Clinical user view:

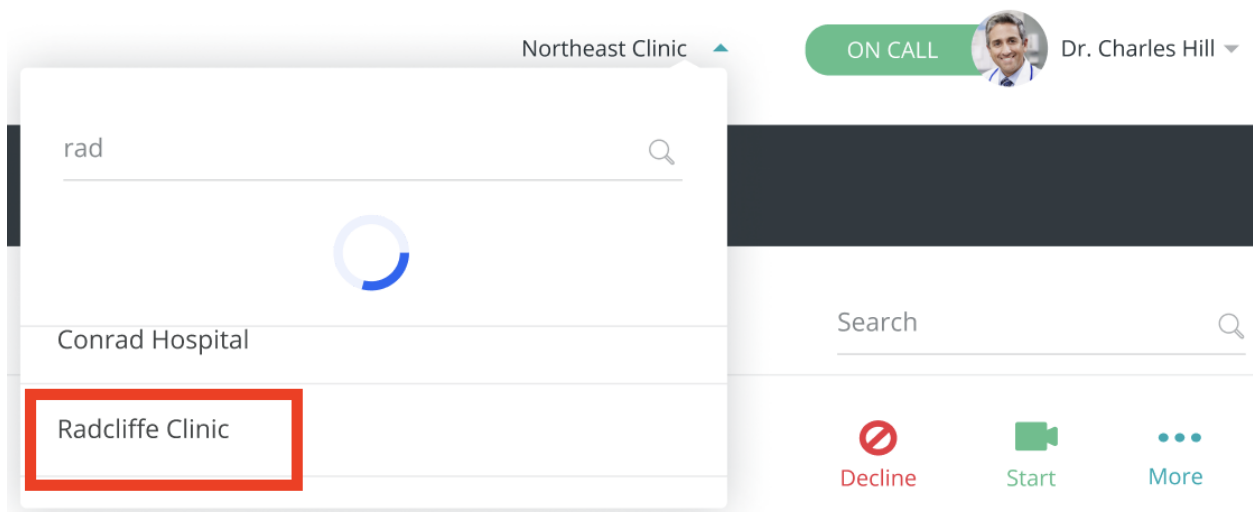

Patient view:

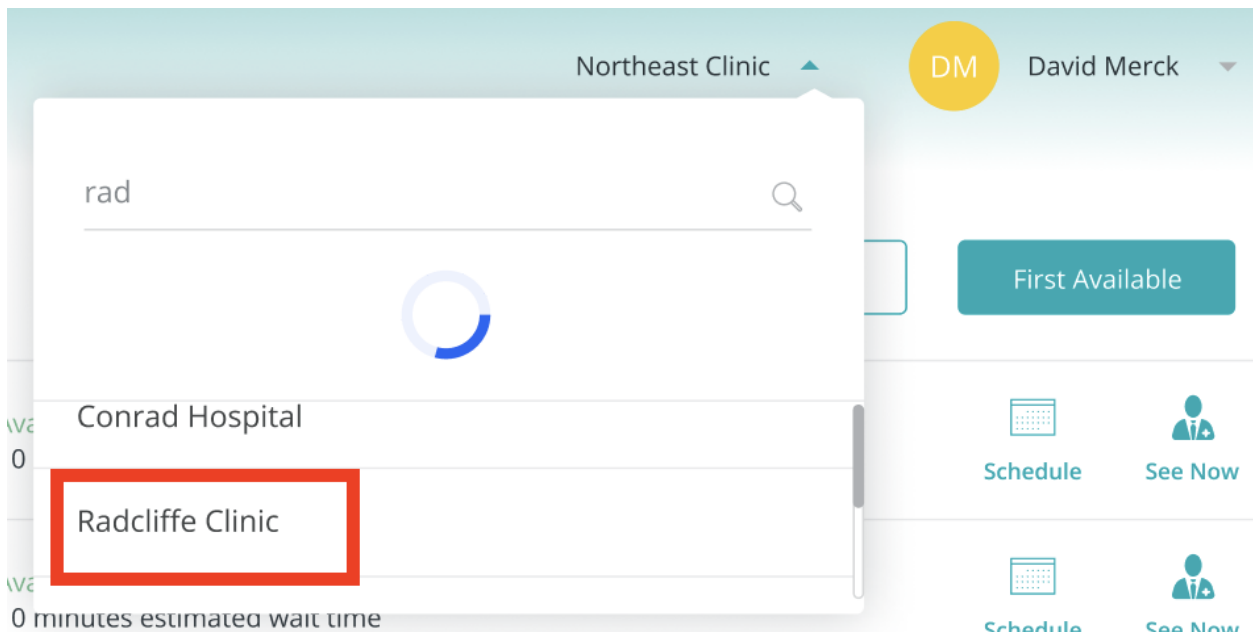

3. User clicks the practice the user would like to switch to and the user is brought to that practice

Clinical user view:

Patient view:

How do I get started?

This improvement will be available to all users automatically.

Additional Information

This change will only occur on the web platform, not mobile web nor the native application.
