

# HIGHLIGHTS & INSIGHTS

FROM RISK MANAGEMENT PRESENTATIONS AT

**PROJECT CONTROLS EXPO VIRTUAL 2020**

# Project Controls Expo Virtual 2020

Delivered several great presentations, specifically addressing project risk. You may have seen some of them, but chances are you may not have the time to watch all of the full recordings.

To help you decide which presentations you may be interested in viewing sooner, rather than later, a panel of leading project risk experts got together to discuss the following:

- Which presentations they found most interesting and why
- What were the top risk management messages for **Project Controls Expo Virtual 2020**
- Additional valuable advice they would like to share for risk managers

We invite you to [watch this quick video](#) to help guide you to a few of the recorded presentations that we believe will be of great interest to you and will provide you with some valuable insights as we embark on projects in the year 2021!

# Presentations strongly recommended by the panel of risk management experts are as follows:

Gavin Winship is a 30+ year veteran of the commercial and US Department of Energy Nuclear Industry.

Currently, Gavin is the Risk Manager for the Savannah River Remediation (SRR) Liquid Waste Contract, a position he has held for over ten years, while also leading Risk Management activities for Amentum, the SRR parent company.

Gavin is the Chair of the EFCOG Risk Management Task Team which is chartered with promoting continuous improvement and development of Risk Management best practices within the US Department of Energy Complex. Recent published best practices include use of Premortem Techniques, Management of MR and Schedule Margin and Risk-Trigger Methodologies.
