

# R&D SCIENTIST

WANT TO BE PART OF MOVING SCIENCE FORWARD?

## ABOUT THE JOB

Svar Life Science is expanding the pipeline of products and services towards the future of diagnostics, drug modalities and disease indications. We aim to serve patients by providing answers for the pharmaceutical industry, CRO's, clinical hospital laboratories and providers of diagnostic automated systems.

Your responsibility as a scientist is to lead projects from new product development, through feasibility, to launch as well as contribute to innovation and novel investigations into future areas and products of interest for Svar Life Science.

You will:

- Participate actively in the development of the company
- Participate and/or lead the development and validation of reporter gene cells as well as assay performance evaluation
- Work closely with the marketing and the manufacturing team as well as quality assurance
- Add scientific value to existing and new developed products

## ABOUT US

Svar Life Science AB facilitates the development of safe and efficient drugs and optimal treatment of patients by providing cutting edge assays. By offering versatile assay solutions to pharma, biotech and CRO customers Svar Life Science AB is an optimal partner in drug development from the exploratory phase to and beyond clinical trials. We also provide clinical labs and physicians with tools to aid in diagnosis, prognosis, monitoring and treatment of inflammatory and related diseases.

Our aim is to constantly improve and expand our offering to contribute to a better patient care. We have a clear focus in providing tailored assay and laboratory solutions supporting the development of new drugs and providing tools for patient diagnosis and monitoring within inflammatory diseases

Svar Life Science's products already contribute to a healthier world. We are committed to continuously increase that contribution by developing innovative clinical solutions.
