**Steve Huang**  
Global Product Manager, Aerospace Sealants

August 1, 2021

Dear Customer:

We hope this letter finds all of you safe and healthy.

As we work to recover from the global pandemic, we continue to see a very volatile raw material supply chain. There have been shortages of raw materials across the world which have been caused by unprecedented demand, weather issues in Texas continuing to affect feedstock and shipping delays across the globe. Due to the shortages and increase in global demand, we have seen a significant increase to the price of raw materials.

Our raw material suppliers continue to raise prices and extend lead times, often with no advance notice. These market conditions have caused significant challenges for Aerospace Sealants, and due to the inflationary pressures, it is necessary for us to raise prices to offset our costs.

Effective September 1, 2021, Aerospace Sealants will be increasing our prices by 8.2% for new orders received on or after such date, or as permissible by contract. Please note that we may refuse to accept orders received prior to September 1, 2021 that are inconsistent with past conduct between the parties, including orders for amounts in excess of previous orders during a similar or reasonable period.

We appreciate your understanding during these uncertain times. Should you have any questions or concerns, please contact your PPG account representative.

Sincerely,

A handwritten signature in black ink, appearing to be 'SH', written in a cursive style.

Steve Huang  
Global Product Manager  
Sealants
